DBS posted 3Q25 net profit of S\$2,954mn, -2%yoy/ +5%qoq, above GSe (see [First Take: 3Q25 beat on all fronts; 2026 outlook disappointing](#)). At the analyst briefing, DBS highlighted the robust and broad-based liquidity and capital flow seen across markets, evidenced by robust 9% YTD deposit growth on constant currency basis, and decent S\$4bn net new money in the quarter. These inflows supported profitability via fee income and NII. We expect deposit growth to remain robust at 7% in 2026, helping to cushion NII, and we forecast 2% growth in NII, higher than guidance of slightly below 2025 level. Therefore, our NPAT is up 5% yoy in 2026E, also ahead of guidance of slightly below.

Overall, we see this as a robust set of results, demonstrating strong wealth performance and continued deposit inflow to support profitability in the rate cut environment, which showcases the bank's strong franchise and effective management. Post results, we update our 2025/26/27E net income estimates by +3.0%/-0.8%/-0.7% to S\$11,139/S\$11,678/ S\$12,405mn as we incorporate higher realized non-NII in 3Q25, but offset by a lower NIM forecast to bake in the lower reported NIM sensitivity in HK\$ exposure and therefore lower support from the recent HIBOR rebound. We maintain our Buy rating on DBS. Our 12-m target price is updated to S\$64.5 (based on 2-stage DDM) from S\$62.9 previously. Key risks: (-) Unexpected acceleration in rate cuts; (-) Unexpected asset quality deterioration; (-) Mismanaged top management transition.

More details from the briefing:

- **Targets to achieve 2026 NII slightly below 2025 level** with the expectation of 3 Fed cuts in 2026 and MAS bill rate of 1.25%, as S\$ benchmark rate. Regarding NIMs, Sep exit NIM was 1.95% and falling slightly to 1.92% by Oct. DBS provides an update to NIM sensitivity by currency for 2026 - for S\$ book, per 1bps decline leads to S\$16mn decline in NII, based on S\$160bn

floating rate assets, while for US\$ book, per 1bps decline leads to S\$5mn increase in NII, attributed to S\$50bn net floating rate liability. In addition to the floating rate exposure, DBS notes that S\$78bn of the total S\$200bn fixed rate assets will mature in 2026, with an expected repricing at a 50 bps lower rate. Despite these potential headwinds from interest rates, DBS expects the robust deposit growth, especially a +9% YTD growth on constant currency basis, could help to support NII. This strong deposit inflow enables the bank to deploy funds into high-quality investment securities, primarily government bonds, generating a c.1% interest spread. That said ROE is high on this strategy with management noting 50% ROEs due to low risk weights. We expect +1%/+2% NII growth yoy for 2025/26E, with NIM of 2.02% and 1.90% respectively.

- **Wealth to deliver mid-teens growth in 2026.** Wealth management delivered robust fee growth of +23% qoq/ +31% yoy, supported by 18% yoy AUM growth and net new money solid at S\$4bn in 3Q25. DBS observed broad-based growth in AUM across markets, with strong booking originating from both Singapore and Hong Kong booking center, and expects the momentum to continue. We forecast total fee income to come in at +16%/ 13% for 2025/26E.
- **Asset quality remains manageable.** DBS maintains 2025 SP guidance unchanged at 17-20bps, and expects same level for 2026, with potential to write-back GP. The bank emphasizes its highly conservative approach to risk management, evident in its more than sufficient management overlay of S\$2.5bn, including S\$200mn top-up after the reciprocal tariff announcement in Apr 2025, and S\$1.8bn carried from Covid period. The bank has not released management overlay yet, and sees potential for GP writebacks in 2026 depending on the external environment. We forecast 2025E credit cost of 18bps.
- **Committed to S\$8bn capital return plan.** Capital remains robust with fully-loaded CET1 standing at 15.1% by 3Q25. DBS remains committed to returning S\$8bn of excess capital as previously announced. DBS has completed 12% of the announced S\$3bn buyback plan, and the bank aims to execute strategically, increasing repurchases when the share price is relatively low vs. historical levels, thereby providing market support.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company neither has a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
