2Q25 – slight beat; strong fees and AQ offset NIM pressure

Maintain Rating: BUY | PO: 19.00 SGD | Price: 16.87 SGD

2Q25 – loan volume growth better than expected

OCBC reported 2Q25 profits of S\$1.8 bn (-3.5% QoQ/-6.3% YoY) – beat driven by steady loan growth (1.0% QoQ headline, 3.0% QoQ volume), strong WM fees (+32% YoY), cost discipline (CIR 39.2%), healthy AQ (14 bp credit costs), partially offset by weaker NIMs (-12 bp QoQ). Overall, steady set of results as most of the rate cycle driven NIM headwinds were offset by strong delivery on non-II and AQ. June exit NIM was around 1.88% – management expects improvement through 2H.

NIM guidance revised downwards to 1.90-1.95% – other drivers' guidance maintained (mid-single digit loan growth, CIR in low 40s, 20-25 bp credit costs). Overall payout ratio guidance maintained at 60% + share buyback plan in place.

Maintain Buy with PO S\$19.00 – Management tone remains conservative given the macro uncertainties, but continued delivery on AQ front should drive investor confidence. Next catalyst will likely be clarity on new CEO's strategic plan – likely with 4Q results. We maintain our positive view given attractive valuations.

Hits & misses – NIMs likely bottomed by June-end

Hits – steady loan growth, strong WM, benign AQ, cost discipline: 1) loan growth of 1.0% QoQ despite 5% SGD appreciation against USD driven by Singapore mortgages and non-trade corporate loans; 2) 2Q WM fees grew 32% YoY on the back of steady AUM growth; 3) underlying asset quality trends remained intact with NPL ratio stable at 0.9% and credit costs of 14 bp for the quarter; 4) cost disciplined maintained with opex growth of 1.2% for the quarter, resulting in CIR of 39.2%, well below low 40s guidance.

Misses – NIM decline worse than expected – driven by sharp drops in HIBOR and SORA benchmark rates, coupled with slow deposit repricing. Management expects 2H25 NIMs to remain stable / expand slightly from June exit of 1.88% as deposit rate cuts effective May and August flow through to lower funding costs. Time deposits now at 1.50%, down from 2.30% at the start of the year and 2.15% at end-March.

Company Sector

Banks-Multinational/Universal

Company Description

OCBC is the second-largest bank group in Singapore by total assets. OCBC differs from local Singapore banking peers as it has a large life insurance business (88% of SGX-listed Great Eastern Holdings). It has a diversified presence across ASEAN and Greater China. In 2010, it acquired the Asian private banking assets of ING Asia Private Bank and has since rebranded it as Bank of Singapore. In 2014, Wing Hang Bank became a wholly owned subsidiary, expanding the group's Greater China operations.

Investment Rationale

We rate OCBC Buy. As we enter the rate cut cycle, OCBC's lower NIM sensitivity, scope for higher contribution from ASEAN businesses, better wealth management yields and operating efficiency seem under-appreciated by the market. OCBC's management revamp and renewed strategic plan focused on regional flows & wealth management will likely positively surprise over next 1-2 years, in our view. We also expect positive surprises on dividends. Hence we expect DBS's valuation premium over OCBC to narrow.

Key takeaways from analyst call

NIM

- **2Q25 NIMs contract 12 bp QoQ to 1.92%** – largely driven by lower asset yields (17 bp) from lower SORA and HIBOR rates, as well as NIM dilution from HQLA deployment (2 bp), partially offset by slight decline in cost of funding (7 bp).
- **~2.00% FY25 NIM guidance revised downwards to 1.90-1.95%** – NIMs to stabilize / expand slightly from June exit of 1.88% as deposit rate cuts (May and Aug) expected to flow through to lower funding costs starting in 3Q. Guidance is based on 3 more US Fed rate cuts, and historical pass-through effect to local rates (SORA 60%, HIBOR 100%). NII is expected to decline by MSD YoY.

Growth

- **2Q25 loan growth stable at 1.0% QoQ** – driven by Singapore mortgages and non-trade corporate lending
- **Mid-single digit FY25 growth guidance maintained** – 1H25 YTD loan growth has come in relatively healthy so far at 1.7% despite 5% SGD appreciation against USD. Growth will continue to be anchored by customers with more domestic / regional business exposure, such as S-REITs, data centers, and project financing.

Non-II

- **2Q25 non-II growth at 5.4% YoY** – driven by an 36% YoY increase in WM fees – net new money of S\$4 bn for the quarter vs. S\$5 bn in 1Q25. WM customers are still trading and buying structured products amid market volatility, but are leveraging less due to concerns of a sharp market pullback.

Cost efficiency

- **2Q25 CIR in line at 39.2%** – mgmt. continues to exercise cost discipline, and is confident of achieving FY25 CIR guidance of low 40s. 2Q25 opex grew 1.2% YoY.

Asset quality

- **2Q25 credit costs at 14 bp** – underlying asset quality trends remain intact (NPA ratio unchanged at 0.9%). Slight deterioration in Private Banking loans, but largely idiosyncratic and secured. HK CRE exposure remains well managed.
- **20-25 bp FY25 credit costs guidance reiterated** – mgmt. is comfortable with the current level of general allowances, but will have to continuously evaluate as the macroeconomic + tariff situation evolves.

Capital

- Capital mgmt. policies of 60% total payout ratio + share buybacks unchanged
- **Medium-term ROE target of 14% out of reach** given recent sharp decline in benchmark rates, and ongoing uncertainty surrounding macroeconomic / tariff situation. That being said, mgmt. remains focused on growing high ROE non-II segments such as WM.

Price objective basis & risk

Oversea-Chinese Banking Corp (OVCHF)

Our PO of S\$19.00 is derived using a Gordon growth model, which assumes a sustainable ROE of 12.8%, cost of equity of 9.6%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 1.4x.

Downside risks: protracted global economic slowdown, a significant deterioration in the asset quality environment, and volatility of its insurance and trading income. Upside risks are better than expected macro recovery, and higher leverage from more active capital management.

Sell	44	21.78%	Sell	35	79.55%

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1840	53.64%	Buy	1081	58.75%
Hold	807	23.53%	Hold	472	58.49%
Sell	783	22.83%	Sell	375	47.89%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BoFA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such

securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BoFA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BoFA or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BoFA or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.
