3Q25 – good quality beat; wealth biz starting to outperform peers

Maintain Rating: BUY | PO: 19.50 SGD | Price: 17.19 SGD

3Q25 – beat driven by strong fee and trading income

OCBC reported 3Q25 profits of S\$1.97 bn (+8.9% QoQ/+0.4% YoY) – beat driven by strong non-II (WM +53.5% YoY), benign AQ (credit costs 17 bp), stable opex (40% CIR), partially offset by tepid loan growth (0.8% QoQ) and NIM compression (8 bp). Overall, a good quality beat with the strong wealth performance (net new money of S\$12 bn) the key highlight. Asset quality performance also continues to remain quite stable.

FY25 guidance – NIMs revised down to ~1.90% (prev: 1.90-1.95%), credit costs revised down to ~20 bp (20-25 bp). Other drivers maintained (MSD loan growth, CIR in low 40s). Overall payout ratio guidance maintained at 60% + share buyback plan in place.

Maintain Buy with PO S\$19.50 – New CEO transition in 2026 will be the key focus for investors – we expect positive momentum on the wealth business to continue. On capital management, we expect to see a more flexible/pragmatic approach which could be a key source of re-rating and help OCBC narrow the discount with DBS. Current valuations (1.2x PB, 10x PE) offer attractive risk-reward on increasing consistency in earnings delivery and resilient asset quality.

Hits > misses – strong WM segment offsets NIM drag

Hits – strong WM, benign AQ, stable opex – 1) WM fee income rose 53.5% YoY, continuing 2Q's strong momentum. Segment recorded S\$26 bn increase in AUM (S\$12 bn net new money) with % of invested AUM stable at 60%; 2) credit costs healthy at 17 bp with underlying AQ metrics still benign; 3) 40.0% CIR in line with expectations as the bank continued to exercise cost discipline to offset top-line pressures.

Misses – tepid loan growth, NIM compression – 1) loan growth was lukewarm at 0.8% QoQ as tariff concerns continues lingering; 2) NIMs compressed by 8 bp, driven by a 21 bp decline in loan yields and 5 bp compression from HQLA deployment, partially offset by an 18 bp decline in funding costs.

Company Sector

Banks-Multinational/Universal

Company Description

OCBC is the second-largest bank group in Singapore by total assets. OCBC differs from local Singapore banking peers as it has a large life insurance business (88% of SGX-listed Great Eastern Holdings). It has a diversified presence across ASEAN and Greater China. In 2010, it acquired the Asian private banking assets of ING Asia Private Bank and has since rebranded it as Bank of Singapore. In 2014, Wing Hang Bank became a wholly owned subsidiary, expanding the group's Greater China operations.

Investment Rationale

We rate OCBC Buy. As we enter the rate cut cycle, OCBC's lower NIM sensitivity, scope for higher contribution from ASEAN businesses, better wealth management yields and operating efficiency seem under-appreciated by the market. OCBC's management revamp and renewed strategic plan focused on regional flows & wealth management will likely positively surprise over next 1-2 years, in our view. We also expect positive surprises on dividends. Hence we expect DBS's valuation premium over OCBC to narrow.

Key takeaways from analyst call

NIM

- **3Q25 NIMs contract 8 bp QoQ to 1.84%** – driven by a 21 bp decline in loan yields and a 5 bp compression from HQLA deployment, partially offset by an 18 bp decline in funding costs. Decline in loan yields mainly attributable to sharp declines in SORA rates in 2Q and 3Q25.

Exit NIM as of Sep was at 1.84%, but mgmt. is expecting further downward pressure on NIMs as US Fed is expected to cut twice in 4Q25 (1 more 25 bp cut in Dec). HIBOR transmission is also expected to normalize to 100%.

- **~1.90-1.95% FY25 NIM guidance revised downwards to around 1.90%**

Growth

- **3Q25 loan growth tepid at 0.8% QoQ** – growth continues to be driven by new economy sectors (data centers, green economy etc.). Mgmt. noted customers are still hesitant due to start-stop nature of tariff implementation, but acknowledged that interest should return as interest rates continue declining.
- **Mid-single digit FY25 growth guidance maintained** – 9M25 YTD growth 2.5%.

Non-II

- **3Q25 non-II growth positively surprises at 14.7% YoY** – driven by a 53.5% increase in WM fees, 33.5% growth in life assurance profits, and strong trading income (albeit only 2.0% YoY growth on a strong 3Q24 base).

WM segment saw net new money of S\$12 bn, far outperforming peers this quarter. AUM rose S\$26 bn as a result, while % of invested AUM was stable at 60%. Mgmt. attributes this to structural improvements in the WM segment, continued collaboration with Great Eastern, and conducive macro environment (risk-on capital markets + continued inflow of wealth into SG/HK hubs).

Cost efficiency

- **3Q25 CIR 40.0%** – in line with expectations and guidance.

Asset quality

- **3Q25 credit costs at 17 bp** – partially attributable to some HK CRE accounts. Mgmt. noted that accounts were largely idiosyncratic in nature, and do not see any systemic risks.
- **20-25 bp FY25 credit costs guidance revised down to around 20 bp**

Capital

- Capital mgmt. policies of 60% total payout ratio + share buybacks unchanged. Additional measures (if any) will only be announced at 4Q25 earnings call.

Oversea-Chinese Banking Corp (OVCHF)

Our PO of S\$19.50 is derived using a Gordon growth model, which assumes a sustainable ROE of 12.5%, cost of equity of 9.3%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 1.4x.

Downside risks: protracted global economic slowdown, a significant deterioration in the asset quality environment, and volatility of its insurance and trading income. Upside risks are better than expected macro recovery, and higher leverage from more active capital management.

Sell	48	22.86%	Sell	39	81.25%

Equity Investment Rating Distribution: Global Group (as of 30 Sep 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1816	53.11%	Buy	1062	58.48%
Hold	825	24.13%	Hold	480	58.18%
Sell	778	22.76%	Sell	385	49.49%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or

financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.
