4Q25 – well-rounded beat; new corporate strategy prioritizing growth

Maintain Rating: BUY | PO: 21.00 SGD | Price: 21.43 SGD

4Q25 – beat driven by both NII and non-II

OCBC reported 4Q25 profits of S\$1.70 bn (-13.5% QoQ/+1.9% YoY) – beat driven by strong loan growth (+4.3% QoQ), NIM expansion (+2 bp QoQ), strong fees (+16.4% YoY, driven by 26% increase in WM fees), cost control (opex -0.1% YoY), partially offset by higher credit costs (24 bp). Overall, a solid quarter with growth outperforming peers and WM continuing to close the gap with DBS. OCBC's new corporate strategy was also unveiled – while the focus areas remain unchanged (targeting wealth, new economy sectors, tech etc.), there is a much clearer focus on realizing synergies between OCBC's various subsidiaries (particularly BOS and GE) across ASEAN and Hong Kong.

FY26 guidance – 1) total income stable to growing, slight to moderate decline in NII; 2) MSD loan growth; 3) CIR 40-45%; 4) 20-25 bp credit costs; 5) 50% base payout ratio.

Maintain Buy with PO S\$21 – OCBC valns (1.5x now from 1.2x P/B) have outperformed the sector on strong WM momentum and optimism surrounding new management and further capital mgmt. plans. We maintain Buy on OCBC given that WM momentum has been sustained despite some seasonality, with upside in the medium-term likely driven by synergy realization from the new corporate strategy. One risk is the lack of clarity surrounding excess capital – given that the bank will have to allocate some capital to accelerate investments and spending in these new focus areas.

'The Next Frontier' corporate strategy to drive growth

There is a renewed focus on realizing synergies between OCBC, GE and BOS across HK and ASEAN – 1) enhancing value proposition across wealth continuum via its OCBC, BOS and GE platforms; 2) focusing on growing affluent segment in HK (which we believe is highly profitable and scalable if OCBC can replicate the success in Singapore); 3) leveraging on existing customer base in subsidiaries and focus on cross-selling (esp GE Malaysia); 4) leaning on BOS' capabilities to grow UHNW segment in Indonesia.

Company Sector

Banks-Multinational/Universal

Company Description

OCBC is the second-largest bank group in Singapore by total assets. OCBC differs from local Singapore banking peers as it has a large life insurance business (88% of SGX-listed Great Eastern Holdings). It has a diversified presence across ASEAN and Greater China. In 2010, it acquired the Asian private banking assets of ING Asia Private Bank and has since rebranded it as Bank of Singapore. In 2014, Wing Hang Bank became a wholly owned subsidiary, expanding the group's Greater China operations.

Investment Rationale

We rate OCBC Buy. As we enter the rate cut cycle, OCBC's lower NIM sensitivity, scope for higher contribution from ASEAN businesses, better wealth management yields and operating efficiency seem under-appreciated by the market. OCBC's management revamp and renewed strategic plan focused on regional flows & wealth management will likely positively surprise over next 1-2 years, in our view. We also expect positive surprises on dividends. Hence we expect DBS's valuation premium over OCBC to narrow.

Key takeaways from analyst call

Revamped strategy – ‘The Next Frontier’ of growth

New CEO Tan Teck Long unveiled initial details of OCBC’s new corporate strategy, aimed at driving growth in more capital efficient business segments to achieve stable to growing ROEs in the medium-term.

- **Franchise shift** – to deepen franchise in SG/HK twin hub and deliver a more complete set of wealth offerings via OCBC, BOS, GE. Focus area: HK’s affluent segment.

Also to deepen footprint in domestic ASEAN markets and grow wealth business in Malaysia and Indonesia. Mgmt. believes there are large opportunities to be synergized across platforms – i.e. Great Eastern Malaysia currently boasts ~3mn customers, which can be crucial to growing the regional wealth platform.

- **Asia shift** – to capture ASEAN-China trade flows + Asian wealth flows through SG/HK hubs
- **Tech shift** – to intensify investments into tech, digital infrastructure, AI to grow income and capabilities
- **Net-zero shift** – to continue expanding coverage of green sectors like renewables

NIM

- **4Q25 NIMs expand 2 bp QoQ to 1.86%** – driven by improvements in funding costs, partially offset by lower yields and higher HQLA mix.
- **FY26 NII guided at slight to moderate decline** – assuming average 3M SORA of 1.4%, Fed rate of 3.5% and 3M HIBOR at 2.8%. Downside risk if 3M SORA lands lower than 1.4%.

Growth

- **5Q25 loan growth strong at 4.3% QoQ** – broadly driven across various growth sectors.
- **FY26 growth guided at MSD**

Non-II

- **4Q25 non-II growth strong at 37.4% YoY** – driven by a 26.4% increase in WM fees, and strong trading income. WM segment saw net new money of S\$6 bn, while % of invested AUM crossed 60%.

Cost efficiency

- **4Q25 CIR 43.1%** – in line with expectations and guidance.
- **FY26 CIR guided to 40-45%**

Asset quality

- **4Q25 credit costs at 24 bp** – largely driven by continued CRE stress from 2 accounts. These accounts are reported to be well collateralized and already largely provisioned for.
- **FY26 credit costs guided to 20-25 bp** – in-line with through-cycle averages.

Capital

- **FY26 payout ratio guided to 50%** as capital requirements from OCBC’s new growth strategy is expected to increase.

Oversea-Chinese Banking Corp (OVCHF)

Our PO of S\$21.00 is derived using a Gordon growth model, which assumes a sustainable ROE of 12.5%, cost of equity of 9.0%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 1.5x.

Downside risks: protracted global economic slowdown, a significant deterioration in the asset quality environment, and volatility of its insurance and trading income. Upside risks are better than expected macro recovery, and higher leverage from more active capital management.

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1869	53.99%	Buy	1069	57.20%
Hold	834	24.09%	Hold	481	57.67%
Sell	759	21.92%	Sell	383	50.46%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile

and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein.
