

Asia Credit Roundup

Weekly Review: November 7

- Market overview – Drifted marginally lower
- US HG – Spreads widened amid heavy supply
- Asia financials – Near the tight vs. DM financials
- China/HK IG – A stable week
- China HY – Weekly drop weighed by Vanke
- Macau gaming – Flat total return despite decent 3Q results from Wynn Macau and Melco Resorts
- Indian corporates – HY outperformed IG
- Indonesia corporates – Underperformed the market

Market overview – Drifted marginally lower

Asia credit closed the week marginally lower. The JACI lost 0.02% total return last week as credit spreads widened by 6bp to SOT+127. While both JACI IG (+5bp) and HY (+19bp) widened last week, we still saw some spread decompression between IG and HY. This likely reflects rising concerns about credit risks down the rating spectrum, as seen in both the US and the region. Despite last week's retreat, the JACI has still achieved a 7.62% total return year-to-date (YTD), consisting of 5.27% from Treasury Return and 2.24% from Spreads Return, or 3.87% from carry and 3.62% from price gains. The main focus for the market last week was the US\$1.9 billion exchange announcement from New World Development, which led to mixed reactions from different investor bases. New issues were also in focus, with the key highlight being a sovereign issue from North Asia.

Asia outperformed its peer indices. The JACI (-0.02%/+6bp) outperformed the CEMBI Broad (-0.06%/+5bp), and the EMBIG (-0.39%/+8bp). Within the CEMBI Broad, Asia (0%/+5bp) outperformed LATAM (-0.22%/+7bp), and CEEMEA (0%/+3bp). Compared to US comps, CEMBI Broad Asia IG (+0.06%/+3bp) outperformed US IG (-0.2%/+4bp), and Asia HY (-0.24%/+19bp) outperformed US HY (-0.31%/+17bp).

Mixed economic news from the US. Last week marked the longest federal shutdown in U.S. history. Our economists are concerned that such a prolonged shutdown could have a lasting impact on the economy, as flight disruptions increase and food assistance decreases. One consolation is that the labor market remains more resilient than feared, judging by the October ADP report of 42k new private jobs. Another surprise was in trade policy. In its first hearing on the use of the International Emergency Economic Powers Act, Supreme Court members voiced skepticism about the arguments presented by administration lawyers,

See page 14 for analyst certification and important disclosures.

J.P. Morgan does and seeks to do business with companies covered in its research reports. For key risks and catalysts not already described in this report, please refer to the most recent [Emerging Markets Corporate Coverage Report](#).

raising the possibility that reciprocal tariffs may be ruled illegal, perhaps by the year end. Meanwhile, both the PMI (54.6) and ISM services (52.4) surveys recovered in October. Our economists have highlighted that such a PMI reading is usually consistent with about 2.5% GDP growth. Overall, the U.S. economy has remained resilient despite disruptions from higher tariffs and the government shutdown. While recession risks have abated, we have to deal with the possibility that rates could settle at higher levels than previously thought.

Mixed economic data from Asia. In China, October exports fell more than expected (down 1.1%/y/y; 3.9%/m/m, sa). Our economists believe this was mainly due to the Golden Week holiday effects and shipping disruptions, and they expect a modest recovery into the year-end due to festival demand and rebounding port activity. For this week's October activity data, the sharper export contraction also suggests that industrial production may underperform forecasts. In contrast, Taiwan reported a surge in exports (10%/m/m, sa) in October after a sequential drop in September. Other Asian countries are likely to confront 4Q25 challenges after two quarters of above-trend growth. While we may see weaker 4Q25 GDP for most countries in the region, the strong start to the year should mean that full-year growth remains supportive of Asia's credit fundamentals.

We expect it to be more of a carry market until the year-end. Market sentiment has oscillated between positive and negative in recent weeks. Looking ahead, any resolution of the U.S. government shutdown would likely provide a much-needed boost to sentiment. However, we do not see much room for further spread tightening from here, with JACI IG already trading close to its historical tight and better quality HY names trading at a low 5%-handle. US Treasury movements have become the main driver of total returns, and this is likely to remain the case until the year-end in our view. We reiterate our view that investors should gradually move up the credit curve to IG, given the spread compression of HY and IG.

Primary market activity was active. Issuers raised USD 7.6 billion last week, marking the highest weekly issuance since late June. This brings the YTD supply to approximately USD 167.1 billion, about 14.1% higher than the same period last year. Last week's supply was skewed towards the IG side, with issuers including a sovereign, three quasi-financials, one quasi-corp, and one financial issuer. On the HY side, supply came from the Laos sovereign and one Chinese quasi-corp issuer. New issues have attracted strong demand, suggesting that investor appetite remains healthy. We expect primary market activity to start to quieten leading up to Thanksgiving.

US HG – Spreads widened amid heavy supply

HG market widened last week (+4bp w/w), with JULI spreads closing at 94bp. The index yield was up by 4bp to 5.2%. High Grade fund flows accelerated to +\$10.3bn last week, up 65% w/w and well above the four-week average of +\$7.6bn. This marks the strongest inflow since late September and is also the fourth-largest this year. Strong ETF inflows of +\$6.5bn (the highest since mid-August) accounted for 63% of the total, while mutual funds contributed +\$3.8bn, up +\$3.8bn w/w. As of Thursday, last week's issuance was \$57bn (YTD \$1522bn). Issuance in November has averaged \$102bn over the past four years, with most of the supply coming in the first half of the month. Looking ahead, our US HG team [expects](#) heavier November supply than usual, driven by AI-related issuance and higher M&A supply.

Fed speakers last week generally reinforced Powell's previous message that a December rate cut is very far from a foregone conclusion. In the absence of the October jobs report, other jobs indicators suggest that, on net, the labor market remains tepid, with little hiring but also few layoffs. Overall, there's no clear evidence of further weakness in the labor market. This week, the new weekly ADP employment data and jobless claims will be the only notable releases. Positively, according to the latest Bloomberg [report](#), the Senate voted 60-40 on a

procedural measure Sunday evening to advance a bill to end the government shutdown, with a group of moderate Democrats breaking with their party leaders to support the deal. To reopen the government, the Senate will need the consent of all members. However, even when the government reopens, it will take some time for data releases to begin to resume. (see [report](#))

Asia financials – Near the tightness vs. DM financials

The sector outperformed. Spreads widened only 4bp while returns were positive, at 0.1%. Meanwhile, DM financials moved only 3bp wider. Our colleagues in EM Corporate Strategy [noted](#) over the weekend that the CEMBI BD IG was at one point last week only 6bp wider than the US high-grade market, the tightest post-crisis excluding the distortion during COVID-19 in March 2020. We see a similar relationship when looking at z-spreads for Asia financials vs. DM financials, with the relationship as tight as 6bp last week, although it ended at 10bp. Digging into country segments, India financials stood out for underperformance, as spreads moved 10bp wider. Thailand also underperformed, with spreads moving 6bp wider. By contrast, China financials widened only 1bp, while South Korea and Singapore financials moved 2bp wider. Banks in Singapore reported 3Q results in the latter part of the week. Profitability was very strong for DBS, while UOB's report was impacted by a pre-emptive provision expense. OCBC's report was closer to in-line. This is now primarily a segment comprised of Tier 2 bonds following DBS's redemption of the last US\$ AT1 earlier this year. We have a favorable view of Singapore bank bonds and reiterated an Overweight recommendation on OCBC's 4.55% 2035 Tier 2 with a 2030 call date. This is offered at z +115bp (SOT+85bp, \$99.9, 4.6%). AT1 generally moved wider, and Asian AT1 were 13bp wider, holding in slightly better than European AT1, which widened 14bp. Other EM regions were more resilient, with LATAM AT1 widened 5bp, while Middle East AT1 was unchanged.

China/HK IG – A stable week

China/HK IG were flat last week, in line with Asian IG peers (-0.1% to +0.1%), as both Treasury and spread returns were stable over the past week. China CPI inflation reversed two months of decline to +0.2% yoy in October, mainly driven by strong price increases of gold (+50% yoy) and platinum (+42%) jewelry last month. PPI deflation continued to narrow to -2.1% yoy in Oct, as some industrial sectors remain affected by capacity checks, safety supervision, and phase-out of outdated capacity. J.P. Morgan's China Economic research team believes China will unlikely exit deflation soon, as policy continues to prioritize manufacturing over services, and investment over consumption. Ongoing broad-based oversupply will continue to weigh on price levels, and the team sees full-year CPI/PPI flat/-2.6% yoy. Meanwhile, China's October exports/imports both missed market expectations at -1.1%/+1% yoy, and exports to the US dropped 25% amidst elevated tariffs and ongoing diversification from the US market. Please see the team's [report](#) and [report](#) for details.

Over in Hong Kong, Swire Properties released 3Q25 operating data last week. On the retail side, both Mainland China and HK tenant sales growth accelerated from +3% yoy in 2Q25 to +7-8% in 3Q, and we expect tenant sales improvement will continue into the year end. For HK office, the occupancy rate marginally improved to 92% in 3Q (2Q25: 91%), but the overall trend remained weak with a double-digit % negative rental reversion. We see positive implications from the Swire release for Hysan, which has a sizeable exposure to retail and office space in HK. Hysan's earnings have started to recover since 2024, as higher rental income from its shopping malls, as well as increased contribution from Lee Garden Shanghai, more than cushioned the downward pressure on its office space. Its recently announced HK\$8 billion capital recycling plan should help the company accelerate its deleveraging, before Lee Garden Eight (due for completion in 2H26) adds another new layer of earnings. We are OW across the curve, and recommend Hysan 7.2% perp (104.6 offer, 6.1% ytw, z+270) as the top pick for investors looking to benefit from the initial recovery and stabilization of the HK retail

market. Please see our recent [Hysan report](#) for details.

China HY – Weekly drop weighed by Vanke

China HY/HY Property dropped 0.7%/2% last week, lowering YTD returns to +8.8%/11.3%. The correction was mainly driven by >8pts correction of the VNKRLC curve last week, as a result of (1) the recent [SZM/Vanke loan agreement](#) that caps total shareholder loans at Rmb22bn (i.e. only an additional Rmb2.3bn of funding will be provided), (2) an Octus report that the Guangdong provincial government has rejected Vanke's consolidation into SZM, and (3) S&P's downgrade of Vanke to CCC with a negative outlook due to deteriorating liquidity and heavy financial commitments. That said, there were also some positive headlines over the week, as (a) Octus reported that the central government directed Shenzhen last month to maintain Vanke's stability, and (b) Vanke's onshore bonds have remained resilient with most lines trading at 90 to par, which is nowhere near distressed. We [downgraded](#) VNKRLC '27s (bid/ask: 59.5/60.8) and '29s (52/53.4) to N last week, as we believe SZM's loan agreement implies limited incremental funding support, and it remains unclear how Vanke will deal with refinancing given reduced support from SZM. We still don't believe that Vanke is a default candidate, but the absence of a possible consolidation into SZM (as earlier reported) has removed a major catalyst for this credit, which is another reason for our downgrade to Neutral as well.

China HY Industrials ended last week with a negative total return of -0.05%, bringing YTD returns to +13.2%. The sector outperformed JACI HY (-0.23%) and JACI HY corp (-0.31%) in terms of total return. Most HY industrial bonds we track posted negative price performance last week, with WESCHI '26s and Fosun '29s the only bonds showing positive gains of 0.14pt and 0.07pt, respectively. News flow was mostly quiet for HY Industrials. Next Tuesday (Nov. 18), Health and Happiness will release operational updates for the nine months ended 30 September 2025, providing more cues on its 3Q result.

Macau gaming – Flat total return despite decent 3Q results from Wynn Macau and Melco Resorts

The Macau gaming sector was flat in terms of total return last week. While credit spreads widened 10bp to SOT+174, this was cushioned by carry. The YTD return stands at 8.48%. At the individual bond level, performance was mixed but skewed slightly more to the negative side. On the news flow side, both Melco Resorts and Wynn Macau posted decent 3Q results last week, with deleveraging trends remaining on track.

Melco reported its highest EBITDA level in 3Q since reopening. Melco's Property EBITDA rose +1% q/q and +18% y/y to a post-reopening high of \$380m, driven by strong non-Macau recovery and favorable VIP luck. Adjusted for luck, EBITDA was still solid at \$356m. Macau EBITDA was impacted by a 4% drag due to a super typhoon and casino shutdown in September, with Macau gaming share falling 110bps to 14.6%, its lowest in a year. However, improved non-Macau operations (+32% q/q to \$62m) more than offset Macau weakness. Management commentary was upbeat on 4QTD momentum. On the balance sheet side, Melco's net debt decreased to US\$5.8 billion from US\$6.0 billion, while total liquidity increased to US\$2.60 billion from US\$2.27 billion in 2Q, sufficient to cover the US\$600 million bond maturing in 2027. Solid 3Q results keep us comfortable with Melco's credit story. As Melco bonds continue to trade slightly wider among Macau gaming names, we maintain OW on its long-end bonds. Melco '32 (105.2 offer, 5.9% ytw, z+257) remains our top pick in the sector.

Wynn Macau delivered a strong 3Q result with double-digit EBITDA growth. GGR rose 12% q/q to US\$1.01 billion, outperforming the industry's 2% q/q growth. This drove adjusted EBITDA up 22% q/q and 17% y/y to US\$308m. Reinvestment rates declined across

properties and segments, helping offset higher opex and supporting margin expansion. Wynn Macau gained 120bps of market share to 13.0% in 3Q, led by the mass/slot segment. As of end-3Q, Wynn Macau had \$973.3 million in cash and \$1.36 billion in available borrowing, sufficient to cover the \$750 million bond maturing in 2027. Total debt rose slightly to \$5.81 billion. While we remain comfortable with Wynn Macau's credit story and its deleveraging process driven by higher EBITDA, we maintain a Neutral rating on the issuer and its bonds ('27s, '28s, '29s, and '34s) as valuations look fair in the 5.5-6.0% range. Within the sector, we see better value in wider trading names such as Melco '32s (105.2 offer, 5.9% ytw, z+257), Sands China '28s (101.9 offer, 4.5% ytw, z+120) and '29s (94.6 offer, 4.6% ytw, z+126), and LVS '34s (104.8 offer, 5.4% ytw, z+188).

Outside Macau, Genting Berhad (GENT) has made its privatization offer for Genting Malaysia (GENM) unconditional after it raised its stake in GENM to 52.014% (+0.746% vs 49.359% on October 9) as of November 7. The offer remains open for additional shareholder acceptances until November 24, the first closing date, and GENT has not revised the offer price. We continue to believe the offer may not attract widespread acceptance from minority shareholders, as it does not include any premium for the potential New York license. Therefore, we do not anticipate GENT will meaningfully increase its stake from here. While we expect additional funding for the acquisition and the potential NY casino project to result in some deterioration of Genting's credit metrics, our base case remains that GENT (and thus GENM) should maintain its IG rating.

Separately, GENT's subsidiary Genting Singapore reported a decent 3Q result. Its EBITDA was up 19% q/q and 14% y/y to SG\$257m after adjusting for VIP luck, though still 15%+ below pre-COVID levels. The opening of the Weave mall and Oceanarium boosted RWS's non-gaming revenue in 3Q. Market share slipped slightly to an all-time low of 30% (-1%pt q/q; hold-normalized). Our equity research colleague DS Kim believes that successful ramp-up of the recent projects may help GENS regain some market share from MBS into FY2026 and beyond, especially as the all-suites Laurus (formerly Hard Rock hotel) returns in 4Q ([link](#)). Overall, we remain comfortable with Genting Group's credit and maintain OW on GENM '31s (90.9 offer, 5.9 ytw, z+250). Additionally, Resorts World Las Vegas '29s, '30s, and '31s are trading at yields above 8%, offering attractive risk-reward.

Indian corporates – HY outperformed IG

On the macro side, tax collections for 1HFY26 fell short of the budget target, growing at 2.95oya, well below the 12.5% full-year budgeted target. This suggests that spending may need to be cut in 2HFY26 for the government to stick to its fiscal deficit target of 4.4% of GDP. At the same time, monetary and regulatory easing has fueled a steady acceleration in credit growth, driven by increased lending to MSMEs, NBFCs, commercial real estate and infrastructure sectors. (see [here](#))

JACI India IG Corporates lost 0.04% in total returns as spreads widened by 5bps to SOT+120bps. The space underperformed the broader JACI BBB Corporate index (+0.03%/+4bps). The UST yield curve steepened last week which put pressure on duration. The Adani complex led last week's underperformance, ending 5-15bps wider on z-spreads across group companies. Adani Ports reported robust 2QFY26 results last week with consolidated revenue rising 30% yoy (flat qoq) to Rs91.7bn and EBITDA up 27% yoy (+1% qoq) to Rs55.5bn, driven by strong performance across domestic and international ports, logistics, and marine segments. Fitch revised its outlook on ADSEZ to Stable from Negative and affirmed its long-term rating at BBB-. We remain OW on the ADSEZ curve with a preference for ADSEZ '31s (89.2 offer, z+209bps, 5.53% ytw) and '32s (90.9 offer, z+211bps, 5.60% ytw) (see [here](#)). Bharti also reported solid 2QFY26 results as reported consolidated EBITDA jumped by 6.2% q/q (+35.9% y/y) to Rs299.2bn on the back of a 5.4% q/q (+25.7% y/y) increase in revenue to Rs521.5bn. The deleveraging trend continues with annualized net leverage dropping to

~1.7x for 2Q (see [here](#)). Moody's upgraded Bharti's rating to Baa2 from Baa3 and revised its outlook to stable from positive. We remain comfortable with the company's solid credit profile. However, bond valuations seem to price in an upgrade to BBB levels. We remain UW on Bharti '31s (94.0 offer, z+103bps, 4.48% ytw) on valuations.

JACI India HY corporates lost 0.07% in total returns as spreads widened by 15bps to SOT+328bps. The space performed in line with the JACI BB Corporates index (-0.07%/+14bps). UPL reported strong 2QFY26 results as the trend of healthy volume, mildly lower pricing and favorable input costs continued to support EBITDA for the company (up 34% y/y to Rs23.2bn). Management also revised up its EBITDA guidance for FY26. We maintain our OW on the UPLIN '30s (93.3 offer, z+294bps, 6.35% ytw) but revised our recommendation on the '28s (97.2 offer, z+249bps, 5.87% ytw) to Neutral (see [here](#)).

Indonesia corporates – Underperformed the market

Indonesias quasi-sovereigns lost 0.15% in total returns as spreads widened by 3bps to SOT+118bps. The spread pickup offered by the quasi-sovereigns over the sovereign narrowed by 1bp to 45bps. **JACI Indonesia IG corporates lost 0.12% in total returns as spreads widened by 7ps to SOT+137bps.** This market segment underperformed the broader JACI BBB Corporate Index (+0.03%/+4bps). Freeport Indonesia's (PTFI) US-based parent company, FCX, [released](#) its 8-K and 10-Q reports for 3Q25 last week. The company expects to retain 49% ownership interest in PTFI until 2041 and transfer an additional 12% stake to MIND ID in 2042. Additionally, the company mentioned PTFI resumed operations at the unaffected Big Gossan and Deep Mill Level Zone underground mines in late October 2025. While we await the final outcome of the ongoing negotiations between MIND ID and FCX, our base case remains that FCX will retain operational control of the mine. FCX's recent comments reinforce this expectation, which should be positive for PTFI (see [here](#)). We remain OW on the FRIDPT '32s (101.6 offer, z+152bps, 5.02% ytw) and '52s (102.9 offer, z+199bps, 5.98% ytw).

JACI Indonesia HY Corporates ended the week flat in total return terms as spreads widened by 15bps to SOT+380bps. Indika reported better than expected 3Q results. The company has so far been able to contain cash costs and offset the impact of a sharp drop in thermal coal prices over the past few months. With thermal coal prices showing some signs of stabilization, the company should be able to extend its liquidity buffers until the Awak Mas mine comes online, for which the company continues to guide CoD in 4Q26 (see [here](#)). We remain OW on the INDYIJ '29s (100.3 offer, z+527bps, 8.66% ytw).

Changes to top trade recommendations

Last week, we made the following changes to our top trade recommendations:

- Added one top pick: Freeport Indonesia (FRIDPT) '52s

Table 1: J.P. Morgan Asia credit index performance

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Research excerpts: This material may include excerpts from previously published reports. For access to the full reports, including analyst certification and important disclosures, please contact your sales representative or the covering analyst’s team, or visit <https://www.jpmorganmarkets.com>.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to Hanwha Life Insurance, Kookmin Bank, LG Energy Solution, NTT (9432), Rakuten Group (4755), Shinhan Bank, SK hynix or related entities.
- **Manager or Co-manager:** J.P. Morgan acted as manager or co-manager in a public offering of securities or financial instruments (as such term is defined in Directive 2014/65/EU) of/for Kookmin Bank, NTT (9432), Shinhan Bank or related entities within the past 12 months.
- **Beneficial Ownership (1% or more):** J.P. Morgan beneficially owns 1% or more of a class of common equity securities of LG Energy Solution or related entities.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: Hanwha Life Insurance, Kookmin Bank, LG Energy Solution, NTT (9432), Rakuten Group (4755), Shinhan Bank, SK hynix or related entities.
- **Client/Investment Banking:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as investment banking clients: Kookmin Bank, LG Energy Solution, NTT (9432), Shinhan Bank or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: Hanwha Life Insurance, Kookmin Bank, LG Energy Solution, NTT (9432), Rakuten Group (4755), Shinhan Bank, SK hynix or related entities.
- **Client/Non-Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-securities-related: Kookmin Bank, LG Energy Solution, NTT (9432), Rakuten Group (4755), Shinhan Bank, SK hynix or related entities.
- **Investment Banking Compensation Received:** J.P. Morgan has received in the past 12 months compensation for investment banking services from Kookmin Bank, LG Energy Solution, NTT (9432), Shinhan Bank or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from Kookmin Bank, LG Energy Solution, NTT (9432), Shinhan Bank or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from Hanwha Life Insurance, Kookmin Bank, LG Energy Solution, NTT (9432), Rakuten Group (4755), Shinhan Bank, SK hynix or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of Hanwha Life Insurance, Kookmin Bank, LG Energy Solution, NTT (9432), Rakuten Group (4755), Shinhan Bank, SK hynix or related entities, if any.

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

***Indicates representative/primary bond/instrument.**

The table(s) above show the recommendation changes made by J.P. Morgan Credit Research Analysts in the subject company and/or instruments over the past three years (or, if no recommendation changes were made during that period, the most recent change). Notes: Effective April 11, 2016, J.P. Morgan changed its Credit Research Ratings System. Please see the Explanation of Credit Research Ratings below for the new definitions. The previous rating system no longer should be relied upon. For the history prior to April 11, 2016, please call 1-800-447-0406 or e-mail research.disclosure.inquiries@jpmorgan.com.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:

J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used. We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). J.P. Morgan Emerging Markets Sovereign Research uses Marketweight, which is equivalent to Neutral. NR is Not Rated. In this case, J.P. Morgan has removed the rating for this particular security or issuer because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating no longer should be relied upon. An NR designation is not a recommendation or a rating. NC is Not Covered. An NC designation is not a rating or a recommendation. For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

J.P. Morgan Credit Research Ratings Distribution, as of October 04, 2025

	Overweight (buy)	Neutral (hold)	Underweight (sell)
Global Credit Research Universe*	28%	56%	16%
IB clients**	67%	64%	68%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "Overweight," "Neutral" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of

risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED.
