

APAC Credit Roundup

Weekly Review: Week ended May 8

- Market Overview - No longer range-bound
- US HG - Spreads near cycle tights; Expect supportive technicals to cushion heavy supply
- Asia financials – Year-to-date returns break 1.0%
- China IG - Solid gains on spread compression
- China HY - Gains across Property and Industrials
- North Asia IG - Healthy gains across Hong Kong and Korea
- Asia gaming - Positive sector performance amid 1Q26 earnings season wraps up
- Indian corporates - HY spreads at LTM tights as outperformance continues
- Indonesian corporates - Underperformed peers

Market Overview - No longer range-bound

The Asia credit market broke out of its recent trading range. On the back of broad market strength, the JACI tightened 6bp to bring it within 4bp of the recent tights. The market returned 0.3%, bringing year-to-date returns up to 0.8%. Treasury yields moved 1-3bp lower, with the larger moves at the longer end, resulting in a modest flattening of the curve. Still, this action was not enough to be a meaningful driver, and instead it was 0.3% of spread returns that carried the market last week. With little clarity on when the flow of traffic through the Strait of Hormuz will rebound, the fundamental outlook remains at the [crossroads](#) discussed by our colleagues in economic research. Nonetheless, credit markets have taken this uncertainty in stride; we note that the CEMBI reached a record low spread of 169bp last week.

Asia showed mixed performance relative to peer indices. The JACI (+0.31%/-6bp) outperformed the CEMBI Broad (+0.26%/-2bp), but lagged the EMBIG (+0.52%/-3bp). Within the CEMBI Broad, Asia (+0.3%/-4bp) outperformed LATAM (+0.24%/-1bp), and outperformed CEEMEA (+0.22%/-1bp). Compared to US comps, CEMBI Broad Asia IG (+0.27%/-4bp) lagged US IG (+0.36%/-2bp), and Asia HY (+0.43%/-7bp) outperformed US HY (+0.07%/+2bp).

US payrolls increased 115k while the unemployment rate was stable at 4.3%. The overall picture is a favorable one of a stable labor market. The sense that the labor market is on a firmer footing is likely to reinforce the case for a number of Fed officials that the FOMC should move from an easing to a neutral bias, implying that the next rate move could be either up or down. With CPI data out this week, our economists look for a 0.36% gain in core CPI, firmer than markets expect, implying core CPI rose 2.7% oya in April.

For key risks and catalysts not already described in this report, please refer to the most recent [Emerging Markets Corporate Coverage Report](#).

See page 15 for analyst certification and important disclosures.

President Trump will travel to Beijing for a state visit on May 13–15. The summit is expected to address a multi-dimensional package spanning geopolitics, trade, and technology. Agenda items likely include cooperation to de-escalate Middle East risks, managing Taiwan-related red lines, and mutual restraint in competition over critical minerals and high-tech products. Our colleagues in China economics [believe](#) the most likely outcome is a negotiating framework rather than a comprehensive deal, potentially backed by targeted Chinese purchase pledges (e.g., agriculture, aircraft, energy) to extend the tariff truce. The summit coincides with key economic releases and central bank meetings globally, including US and China inflation, GDP, and trade data, which will be closely watched for signals on policy direction and economic resilience.

Primary activity was relatively busy last week. Issuers raised US\$3.7 billion, bringing year-to-date supply to US\$67.0 billion, about 14% lower than the same period last year. On the IG side, the primary market saw issuance from two quasi-financials, one financial, and one sovereign, while the HY side featured three corporates, one quasi-financial, and one financial issuer. Looking ahead to this week, several HY issuers are monitoring the issuance window, but primary activity will likely depend on the US CPI print coming out tomorrow (May 12).

US HG - Spreads near cycle tight; expect supportive technicals to cushion heavy supply

JULI spreads tightened by 2bp to 89bp over the week. The index yield edged down 4bp w/w to 5.44%. HG fund flows saw a broad-based surge to \$12.8bn (+246% w/w) last week, the largest inflow since the first week of February and the fifth-largest on record. Last week, \$35bn of new issuance was priced against just \$17bn of reinvestment income, while maturity and coupon flows jumped to \$51bn this week, 75% above the 2026 weekly average. Foreign demand metrics continue to improve, as markets are still pricing in a 75% chance of a rate hike from both the ECB and the BoJ in June. Overall, technicals are supportive for HG. Large fund inflows, strong reinvestment flows, and improving foreign demand are well positioned to absorb a near-term supply surge. Turning to fundamentals, earnings are strong and positive for HG credit. Our US team highlights that companies with more debt are growing earnings faster than the average, so higher coupons alone are unlikely to force deleveraging. The team expects spreads to remain tight despite heavy issuance, as credit fundamentals are keeping pace with higher debt levels. Valuations remain a key concern for investors, with spreads close to cycle tight. The main debate is whether UST yields will fall sharply upon a more conclusive Iran resolution and the impact on spreads.

Asia financials – Year-to-date returns break 1.0%

7bp of spread tightening was slightly stronger than for the broader index. Asia financials lagged in returns; however, with 0.2% earned last week, the sector's year-to-date returns rose to 1.1%. Remarkably, most country-segments enjoyed spread tightening in the double-digits, with India financials 12bp tighter last week. Fundamentals for financial institutions in this economy remain solid, with earnings reports generally supporting this trend. Manappuram Finance (bond ticker: MGFLIN) reported improvements in asset quality and profitability in the quarter ended March 31, but we [reiterated](#) a Neutral recommendation. With the lender's 2028 bond offered at a yield to weighted average life of 5.7% (\$102.1, z+192bp), we believe spreads already reflect the supportive trends. Financials in China, Taiwan, and Thailand all enjoyed 10bp of spread tightening. The 2029 bonds issued by Chinese lessor Far East Horizon (bond ticker: FRESHK) enjoyed 15bp of spread tightening after S&P removed the CreditWatch negative on the bonds and returned the outlook to stable, removing the central risk for the BBB-rated bonds. Offered at z+169bp (SOT2+154bp, \$99.5, 5.5%), we [reiterated](#) a Neutral recommendation. The relatively defensive sectors of Korea and Singapore financials lagged, with spreads only 5bp tighter. United Overseas Bank (UOBSP) reported

stable trends in the first quarter, with ROE flattish at around 11.5% and resilient asset quality and capital metrics. We [initiated](#) with a Neutral recommendation on the bank's AUD-denominated 2031 senior bond, which is offered at ASW+65bp (\$98.6, 5.4%). Spreads look fair at levels that are in line with Australian major banks. Staying on Australia, the major banks reported decent results, although management commentary was very focused on risks from energy shortages. Primary market activity pushed subordinated bond prices wider, and we took the opportunity to [upgrade](#) Westpac's (WSTP) 6.085% 2041 / '36c subordinated bond to Overweight from Neutral. Offered at ASW+155bp (\$97.2, 6.5% YTC) we think these are an attractive opportunity in the AUD market.

China IG - Solid gains on spread compression

China IG rose 0.37% last week, the best performer in Asian IG (+0.12% - 0.37%). The weekly gains were mainly driven by a 0.35% spread returns as spreads tightened 6bps (vs Asian IG: 4-7bps tighter) to SOT+53, and Treasury returns were flattish. The key news for China this coming week is that the Trump/Xi summit will be conducted in Beijing this Wednesday to Friday (May 13-15). J.P. Morgan China Economics team expects bilateral discussions to focus on (1) Geopolitics (Iran/Taiwan), (2) Competition in critical minerals and high-tech products, and (3) Trade (China may commit to sizable purchases of US goods to extend tariff truce but a comprehensive trade deal is unlikely). Meanwhile, China reported solid April trade data over the weekend. Exports rebounded 6.7% m/m in April after the pullback in March, with a broad-based recovery in shipment to major markets and across products. Import growth slowed to 2.7% m/m on lower energy and commodity imports. Our Economics team believes that if the Trump/Xi summit produces acceptable compromises on trade, tech and geopolitics, it may remove macro uncertainties and pave the way for further trade expansion. Please see the team's [report](#) and [report](#) for more details.

China HY - Gains across Property and Industrials

China HY/HY Property rose 0.7%/1.7% last week, bringing YTD returns to +1.2%/1.3%. China Property sales remained solid over the Golden Week holiday. According to Iceberg Index, during the five-day Labor Day Golden Week, real-time secondary sales volume in the top 25 Chinese cities rose 31% yoy, sustaining the momentum in April (+29% yoy). We expect sales volume will remain solid in May/June, on the back of local-level easing in Shanghai, Shenzhen and Guangzhou recently. Meanwhile, Swire Properties [reported](#) strong Mainland China retail sales in 1Q26, as tenant sales growth accelerated from ~9% yoy in 4Q25 to 13% in 1Q26. We see these updates as positive to Longfor, which has a sizable residential development property (DP) exposure with transformation to investment properties (IP) in China. Longfor has ~Rmb17bn of accessible cash with positive FCFs of Rmb5bn-10bn per year, and we believe it should be able to meet the Rmb6bn-7bn of debt maturities in each of the next two years. We also expect its earnings to return to positive in 2027, as the DP drag abates and IP earnings expand steadily. We stay OW on LNGFOR due to its relatively solid debt servicing ability in China HY Property, with a decent 9-10% yield along the curve.

China HY Industrials ended the week with a +0.27% total return and 9bp of credit spread tightening, bringing YTD performance back into positive territory at +0.10%. The sector lagged both JACIHY (+0.58%) and JACIHY Corp (+0.48%) over the week. Most of the industrial bonds we track finished in the green. Fosun outperformed, with its '29s and '28s rising 0.56pt and 0.42pt in price, respectively. News flow was muted across the sector last week.

North Asia IG - Healthy gains across Hong Kong and Korea

Hong Kong IG rose 0.18% last week (vs Asian IG: +0.12% - 0.37%), mainly driven by a 4bps spread compression to SOT+65. CK Hutchison ("CKHH") [announced](#) last week that

it will sell its 49% stake in the UK telecom operator VodafoneThree to its JV partner, Vodafone Group, for GBP4.3bn (HK\$45.5bn) in cash. CKHH expects to book a HK\$4.7bn gain from the deal, and we estimate the cash proceeds would (1) reduce its net debt by ~40% to HK\$68bn, and (2) lower its net debt to capital ratio from 13.9% (2025) to 8.3%. We note that besides VodafoneThree, CKHH is also reportedly engaging in a number of asset disposals, including the on-going global [port deal](#), potential [Watsons](#) listing, sale of [PARKnSHOP](#) and [telco](#) business spin-off. We stay OW on CKHH as we appreciate its balance sheet deleveraging over the past two years with organic EBITDA growth and asset disposals, and we prefer the belly and long end of the curve for >5% yield.

Swire Properties' 1Q26 data indicated that HK tenant sales growth accelerated from +6% yoy in 4Q25 to +13% in 1Q26. All three HK malls remained fully occupied, and retail sales at Citygate Outlets/Pacific Place rose by 22%/14% yoy. For HK office, negative rental reversion continued at Pacific Place and Taikoo Place. Nevertheless, Swire noted that leasing activities have increased, and with stabilizing office rents in Central, it expects negative rental reversion to narrow at Pacific Place in 2H26. We believe a solid HK retail market and gradual stabilization of office segment is positive to Hysan, and we prefer Hysan 7.2% perp (105.825, 5.7% ytc, z+189) as the best credit to ride on a recovery in HK Commercial Property market.

Korea IG rose 0.21% last week driven by a 7bps spread tightening to SOT+70. Reuters reported last week that SK Hynix has received proposals from major hyperscalers to help finance expansion of its memory chip production capacity and purchase of advanced chipmaking equipment. However, Hynix appears to be cautious about these funding offers, as it may need to lock in capacity for certain hyperscalers at a lower price in return. We believe this news reflects the severe undersupply of memory chips globally, which is supportive of continued robust earnings/cashflow growth for Hynix in the next few years. We believe Hynix's net cash will exceed KRW 50tn (threshold for S&P upgrade to single-A) in 2Q26, and despite solid spread compression YTD, we stay OW on SK Hynix '33s (110.1 offer, 4.7% ytw, z+90) as company balance sheet continues to improve with high likelihood of upgrade to single-A.

Asia gaming - Positive sector performance as 1Q26 earnings season wraps up

The Macau gaming sector grinded higher last week with a +0.29% return, bringing the YTD return to 1.19%. Last week's positive return was driven by 9bp of credit spread tightening to SOT+171 and also lifted by lower treasury yields. We saw the last batch of 1Q26 report cards from Macau gaming; SJM Holdings and Wynn Macau reported 1Q26 results that were broadly in line with expectations. Overall, the 1Q26 results for the sector are generally in line to modestly positive, suggesting the industry's uptrend remains intact. So far, we do not see signs that the prolonged Middle East conflict has dampened gaming demand.

On the company earnings side, SJM's 1Q26 GGR fell 8% qoq / 19% yoy to HK\$6.1bn, as headline market share continued to decline, down 80bp qoq to 9.5%. The drag mainly came from the closure of satellite casinos. However, self-run casino market share rose from 7.6% to 9.6%, driven by the L'Arc acquisition. Adjusted EBITDA was HK\$917mn, up 37% qoq after several disappointing quarters. After adjusting for luck, EBITDA was HK\$883mn (+30% qoq / -5% yoy), broadly in line with market expectations. Despite 1Q26 earnings being in line with expectations, we see the company lagged other Macau gaming names in terms of deleveraging trend. We expect its recovery to remain slower than industry, and thus remain UW on SJM.

Wynn Macau reported 1Q26 GGR of US\$1.0bn, up 3% QoQ and 15% YoY. Headline market share increased 50bp QoQ to 12.5%, driven by a 100bp QoQ gain in mass and slot share to

12.8%, the highest level in nearly two years, which more than offset a ~500bp QoQ decline in VIP share to 13.0% to 13.5%. EBITDA rose 3% QoQ to US\$279m, supported by a lower reinvestment rate. Excluding unfavorable VIP luck, hold adjusted EBITDA was US\$296m, up 3% QoQ, broadly in line with consensus of US\$298m. We remain comfortable with Wynn Macau's credit profile but maintain our Neutral recommendation on the issuer due to valuations. That said, we see value in the 2034 notes yielding in the mid 6% range given the steep curve.

Outside Macau, Resorts World New York reported its first full week of GGR following the Phase 1 opening of the full casino on April 28 (week ended May 3). GGR came in at US\$27.2 million, which annualizes to approximately US\$1.4bn. This is running better than expected, given management's US\$2.7bn GGR target by 2031. The mix was slightly less favorable at an 81:19 split between slots:tables, but it's worth noting that table games have only recently ramped up. Overall, we view this as an encouraging start. We expect the project to benefit the Genting Group through a more diversified earnings base, which should help cushion the higher financial risk associated with the heavy capex required for RWNY. We maintain an OW recommendation across the complex.

Indian corporates – HY spreads at LTM tightens as outperformance continues

On the macro front, the Union Cabinet approved the Emergency Credit Line Guarantee Scheme (ECLGS) 5.0 to keep credit channels open and provide 100% credit guarantee coverage for MSMEs and 90% coverage for non-MSMEs and airlines. The government will effectively underwrite lender risk, rather than disbursing funds directly. Eligible borrowers can access additional credit of up to 20% of peak working capital utilized in 1Q26, capped at ₹100 crore, while airlines — which are bearing the brunt of elevated aviation turbine fuel (ATF) costs — can borrow up to 100% of their peak working capital, subject to a per-borrower cap of ₹1,500 crore.

The Manufacturing PMI rebounded in April to 54.74 from 53.9 in March, but remained below the pre-crisis level. While input prices have firmed meaningfully since the onset of the Middle-East conflict, output prices have increased more modestly, suggesting some margin compression. Please see our economists' note [here](#) for more details.

JACI India IG Corporates gave 0.36% in total returns as spreads tightened by 7bps to SOT+87bps. The space outperformed the broader JACI BBB Corporate index (+0.35/-6bps). Performance was solid across the space, with the Adani complex slightly outperforming. **JACI India HY Corporates gave 0.51% in total returns as spreads tightened by 21bps to SOT+233bps.** The index is now at LTM tightens, having tightened by ~75bps YTD and outperforming its HY peers. Performance was solid across the space last week. UPL bonds outperformed with the '28s and '30s ending the week ~25bps tighter on z-spreads. The company will release its FY26 (for the year ended March 31) results today and will host a results call. We will look for guidance from management to assess the impact of the Middle-East conflict on the company.

Indonesian corporates – Underperformed peers

Indonesia released strong 1Q26 GDP growth of 5.6% oya, beating expectations (JPM:5.25% oya; consensus : 5.4% oya). Domestic demand, led by household consumption and fiscal disbursements, supported growth, while net trade posed a modest drag on growth. Fixed asset investment also registered solid gains, consistent with the faster pace of public capex spending last quarter. Nevertheless, our economists think that the effects of the ongoing energy price shock will be evident in subsequent quarters, with business and consumer sentiment starting to deteriorate, while fiscal policy, which has so far provided

counter-cyclical support, may be required to pull back given the limited room available under the deficit ceiling. The team maintains their FY26 GDP forecast of 4.7%, anticipating a sequential slowdown in the coming quarters (see [here](#)).

The IDR continued to weaken over the course of the week and has reached 17,415/USD levels as at the time of writing. Indonesia's net FXR declined to US\$82.9bn before the April International Reserves and Foreign Currency Liquidity (IRFCL) data in April. The decline in reserves is a clear motivation for allowing more FX weakness in April. Efforts to stabilize FX have since shifted to SRBI issuance as well as deregulation to transmit DNDF intervention to \$IDR NDFs via onshore banks as a result. Our FX strategists remain cautious on the IDR for now, though local and global pressures appear to have peaked, according to the team (see [here](#)).

Indonesia quasi-sov gave 0.66% in total returns as spreads tightened by 8bps to SOT +122bps. The spread pickup offered by quasies over the sov tightened by ~1bps to 59bps over the course of the week. Performance has varied among SOEs, especially at the longer-end, with fundamentally stronger SOEs outperforming. For example, the basis between PLN1J 6.25% '49s (99.3 offer, z+208bps, 6.32% ytw) and PERTIJ 4.7% '49s (83.9 offer, z+174bps, 6.0% ytw) has widened to all-time wides of 32bps. We therefore adjust our top trade recommendations to reflect this, closing PERTIJ '42s and adding PLN1J '49s to the list, as we view current levels as an attractive entry point for the latter.

JACI Indonesia IG Corporates gave 0.26% in total returns as spreads tightened by 5bps to SOT+124bps. The space underperformed the broader JACI BBB Corporate index (+0.30%/-6bps). Bloomberg reported last week ([link](#)) that Freeport Indonesia will delay the ramp-up of its Grasberg mine by a year to early 2028. We note that parent Freeport McMoRan (FCX) already guided in its 1Q26 earnings call (see [here](#)), that the mine will reach 100% capacity by end-2027. We maintain our view that the company has decent buffers in place and remain OW on the FRIDPT '32s (100.5 offer, z+141bps, 5.22% ytw) and '52s (99.2 offer, z+203bps, 6.27% ytw). **JACI Indonesia HY Corporates gave 0.28% in total returns as spreads tightened by 9bps to SOT+349bps.** The space underperformed the JACI BB Corporate index (+0.39%/-12bps).

Changes to top trade recommendations

Last week, we made the following changes to our top trade recommendations:

- Added three top picks: GLP China '29s, Krakatau Posco '29s and Perusahaan Listrik Negara '49s
- Removed five top picks: Petron 'c28s, Star Energy '38s, Adani Ports '32s, Adani Transmission '36s and Pertamina '42s.

Disclosures

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to SK hynix or related entities.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: SK hynix or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: SK hynix or related entities.
- **Client/Non-Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-securities-related: SK hynix or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from SK hynix or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from SK hynix or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of SK hynix or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmmarkets.com> where you can also search by analyst name, sector or financial instrument.

***Indicates representative/primary bond/instrument.**

The table(s) above show the recommendation changes made by J.P. Morgan Credit Research Analysts in the subject company and/or instruments over the past three years (or, if no recommendation changes were made during that period, the most recent change). Notes: Effective April 11, 2016, J.P. Morgan changed its Credit Research Ratings System. Please see the Explanation of Credit Research Ratings below for the new definitions. The previous rating system no longer should be relied upon. For the history prior to April 11, 2016, please call 1-800-447-0406 or e-mail research.disclosure.inquiries@jpmorgan.com.

Explanation of Emerging Markets Sovereign Research Ratings System and Valuation & Methodology:

Ratings System: J.P. Morgan uses the following issuer portfolio weightings for Emerging Markets Sovereign Research: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark credit returns); Marketweight (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark credit returns); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark credit returns). NR is Not Rated. In this case, J.P. Morgan has removed the rating for this security because of either legal, regulatory or policy reasons or because of lack of a sufficient fundamental basis. The previous rating no longer should be relied upon. An NR designation is not a recommendation or a rating. NC is Not Covered. An NC designation is not a rating or a recommendation. Recommendations will be at the issuer level, and an issuer recommendation applies to all of the index-eligible bonds at the same level for the issuer. When we change the issuer-level rating, we are changing the rating for all of the issues covered, unless otherwise specified. Ratings for quasi-sovereign issuers in the EMBIG may differ from the ratings provided in EM corporate coverage.

Valuation & Methodology: For J.P. Morgan's Emerging Markets Sovereign Research, we assign a rating to each sovereign issuer (Overweight, Marketweight or Underweight) based on our view of whether the combination of the issuer's fundamentals, market technicals, and the relative value of its securities will cause it to outperform, perform in line with, or underperform the credit returns of the EMBIGD index over the next three months. Our view of an issuer's fundamentals includes our opinion of whether the issuer is becoming more or less able to service its debt obligations when they become due and payable, as well as whether its willingness to service debt obligations is increasing or decreasing.

J.P. Morgan Emerging Markets Sovereign Research Ratings Distribution, as of April 4, 2026

	Overweight (buy)	Marketweight (hold)	Underweight (sell)
Emerging Markets Sovereign Research Universe*	6%	84%	10%
IB clients**	100%	86%	100%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject issuers within each of the "Overweight," "Marketweight" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Marketweight rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Emerging Markets Sovereign Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:

J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used. We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). For CDS, we use the following rating system: Long Risk (over the next three months,

the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

J.P. Morgan Credit Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
Global Credit Research Universe*	27%	57%	16%
IB clients**	84%	84%	89%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "Overweight," "Neutral" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
