

SINGAPORE BANKS

1Q26 preview: Decent 1Q, with NII, wealth and CoC firmly in focus

1Q26: Seasonal earnings rebound, with modest YoY softness

Singapore banks will report 1Q26 results from 30 April (DBS), followed by UOB on 7 May and OCBC on 8 May. We expect earnings to rebound **qoq** on seasonality, driven by (1) **Recovery in fee income** and other non-NII from a weak 4Q25 base, (2) **Seasonally lower opex**. These positives are partly offset by (3) **Softer NII**, with all three banks seeing **0.8–1.3% qoq declines** on **5–8bp NIM compression** as lower 3M SORA (–16bps qoq) and HIBOR (–66bps qoq) outweigh modest loan growth, as well as (4) **Higher qoq credit costs** reflecting modest management overlays tied to Middle East risks. YoY weakness is largely driven by structurally lower NIMs, with fee income holding up and credit costs broadly comparable to 1Q25, which also included elevated overlays. Overall we expect the least compression on a YoY basis for OCBC (–0.3%) and the most for UOB (–4.4%).

Three key areas to watch (NII, Wealth income and Credit cost)

Beyond the near-term 1Q26 resilience, the focus shifts to how banks navigate a more uncertain macro and geopolitical backdrop with attention on: **(1) NII pressure from lower rates, which we see is manageable** with 3M SORA down 16bps qoq (and falling further in April) and 3M HIBOR down 66bps, pushing spot rates below the more bullish assumptions embedded in banks' NII and NIM guidance. To assess whether guidance may need revision, we apply two lenses: (a) comparing current rates against banks' guided assumptions and applying disclosed NII sensitivities, factoring in offsets from excess deposit deployment and fixed rate asset repricing on a steeper yield curve and (b) applying sensitivities to current spot rates, while incorporating higher excess deposit build up from higher liquidity inflows and slower loan growth. Across both approaches, we estimate incremental NII downside of ~0.8–2.4% vs guidance, or ~–1.8% to –3.0% yoy NII decline at current spot rates—manageable in our view and well within existing buffers, with guidance already framed conservatively. **(2) Wealth management fees remain robust in 1Q26 but 2Q26 the key watch** as 1Q26 is supported by elevated volatility and strong trading activity, with SGX and HKEX ADTs materially higher qoq, underpinning 9–11% yoy fee growth. However, transaction momentum typically softens with a lag if uncertainty persists, making 2Q26 the key period to watch; accordingly, we have moderated 2Q26 yoy fee growth assumptions to 7–8%. **(3) Credit costs could edge higher** as a weaker macro backdrop drives changes in IFRS 9 macro variables and prompts a

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

more conservative stance, including potential management overlays tied to the Middle East conflict. This mirrors 1Q25, when US tariff uncertainty led to overlays that lifted credit costs by up to ~10bps above guided ranges, even as underlying asset quality remained broadly stable.

Remain positive on Singapore banks; Buy DBS, OCBC

Singapore banks' share prices have risen by an average of 6% in 1Q26 and 8% in 2026 YTD, with OCBC outperforming (+11% in 1Q26; +16% YTD), while DBS shares have been relatively muted (+1-2% over the same period). While valuations have re-rated meaningfully, we think this has been largely supported by robust fundamentals, including resilient earnings momentum, solid capital positions and strong inflow in the wealth segment. We remain Buy on DBS and OCBC.

NII: Further downside at current rates, but still manageable

In 1Q26, benchmark rates continued to drift lower, with 3M SORA down 16bps qoq (and falling further in April) and 3M HIBOR down 66bps, taking spot rates below the assumptions embedded in banks' NII and NIM guidance (DBS: ~1.25% SORA; OCBC: ~1.4% SORA and ~2.8% HIBOR). This has raised market concern over whether current guidance—set using relatively bullish rate assumptions—may need to be revised. To assess this, we compare prevailing rates against the rate forecasts used by banks when framing guidance and estimate the implied adjustment to NII. Our analysis suggests that while softer rates do create incremental pressure, the required revision is modest at ~-0.8% to -2.4% of NII ([Exhibit 2](#)), after factoring in disclosed sensitivities, excess deposit deployment and fixed-rate asset repricing. This remains well within management tolerance and, in our view, does not necessitate any change to existing guidance. Banks have already guided conservatively, with DBS flagging NII slightly below 2025 levels, OCBC guiding slightly to modestly below, and UOB guiding NIM at 1.75–1.80%, leaving sufficient buffer to absorb further modest rate declines.

Viewed another way, we apply banks' disclosed NII sensitivities directly to today's spot rate environment, layering in fixed-rate asset repricing, balance-sheet growth and excess deposit gap generation. On this basis, we estimate NII yoy declines of ~1.8–3.0% ([Exhibit 3](#)) across the banks, with UOB the least affected—helped by the sharp cut to its flagship UOB One account in December—and DBS the most impacted, reflecting a larger drag from fixed-rate asset repricing. Even under this more mechanical sensitivity-based approach, the resulting NII declines remain well contained within management guidance ranges.

That said, these estimates are below our current published numbers, reflecting the further decline in SORA since our last update. We have therefore cut our NII forecasts to fully bake in lower SORA, reducing NII by up to average **c.3%** across banks over 2026–28E. We also assume higher deposit growth for most banks, as a stronger S\$ should drive incremental SGD inflows, partially offsetting pressure from lower SORA. On this basis, we now forecast 1Q26 NIM declines of **5–8bps qoq** for the Singapore banks.

Wealth management fee income: Remain robust in 1Q26; 2Q slowdown the key watch

We expect wealth management (WM) fee income to remain robust in 1Q26, supported by elevated market activity and trading volumes. Historically, WM fee growth shows a strong correlation with exchange activity levels, particularly SGX and HKEX ADT, reflecting higher client engagement and transaction-driven fees during periods of volatility. So far, March ADT data has remained strong with 1Q HKEX ADT +20% qoq and SGX ADT +39% qoq, with market volatility driving increased trading activity, reinforcing our view that WM fees will continue to hold up in 1Q26. As such, we see WM as a key near-term offset to NIM pressure, especially for the Singapore banks, where c.30–62% of fees were market-related in 2025 and WM fees accounted for c.24–49% of total fee income.

That said, history also suggests that sustained market weakness tends to impact WM activity with a lag, typically one quarter later, as risk appetite and transaction volumes soften if volatility persists alongside declining asset prices. As a result, our key concern shifts to 2Q26. Given ongoing market uncertainty and continued volatility, we expect a moderation in transacting momentum and have therefore baked in weaker 2Q26 WM fee growth. This flows through to softer overall fee income growth assumptions, even as 1Q26 remains resilient. Overall, while WM fees provide near-term support, we view 2Q26 as the more challenging period should current market conditions persist. That said we do note recent news flow points to incremental wealth inflows from the Middle East into Asia, although volumes thus far appear modest which could help support wealth management fees.

Overall, we expect 1Q26 fee income growth of 9–11% yoy across Singapore banks, driven by elevated market activity, before moderating to 7–8% yoy in 2Q26 as transacting volumes moderate from more sustained market uncertainty, with momentum likely rebounding into 2H26.

1Q26 Preview: Seasonal sequential earnings rebound, but modest YoY softness

Singapore banks will report their 1Q26 results starting with DBS on 30 April, followed by UOB on 7 May and OCBC on 8 May. For 1Q26, we expect **net profit to rebound qoq** across the banks, largely reflecting seasonality, while **yoy earnings are modestly lower**. The sequential improvement is driven primarily by: **(1) a recovery in fee income and other non-NII** following a seasonally weak 4Q25, alongside the normalisation of investment gains amid stronger market activity; and **(2) seasonally lower operating expenses**, supporting operating leverage and continued cost discipline. These positives are partially **offset by: (3) softer NII**, with all three banks seeing **qoq declines of ~0.8–1.3%**, driven by **5–8bp qoq NIM compression** as lower average 3M SORA (-16bps qoq) and 3M HIBOR (-66bps qoq) more than offset modest loan growth of ~0.6–0.7% qoq; and **(4) higher qoq credit costs**, incorporating scope for a modest management overlay related to the Middle East conflict.

On a **yoy basis**, the modest earnings **weakness is driven** mainly by **lower NII on**

structurally weaker NIMs, while fee income growth remains relatively resilient. Credit costs are broadly maintained for most banks, noting that 1Q25 also included elevated provisions due to management overlays linked to US trade tariff uncertainty—an approach we assume again in 1Q26 given ongoing Middle East tension. For:

- **DBS:** We forecast 1Q26 net profit of S\$2,866mn (+26.9% qoq / -1.1% yoy). Earnings are expected to rebound from a seasonally weak 4Q25, driven by a recovery in markets-related activity, with fee income up 27.6% qoq alongside stronger trading volumes. NII is forecast to decline 1.3% qoq, reflecting a 6bp NIM compression to 1.87% on lower SORA and HIBOR, more than offsetting 0.7% qoq loan growth. Overall non-NII is expected to rise 35.4% qoq, supported by a rebound in other non-NII and fees, while opex declines 2.0% qoq, driving PPOP growth of 20.8% qoq. We forecast credit costs of 22bps (+3bps qoq) to incorporate a modest management overlay tied to the Middle East conflict, drawing on precedent from 1Q25, when uncertainties around reciprocal tariffs resulted in 1Q25 credit costs of 30bps (higher than previously guided 17–20bps for SPs). Overall, ROE improves to 16.6% in 1Q26E.
- **OCBC:** We forecast 1Q26 net profit of S\$1,877mn (+7.6% qoq / -0.3% yoy). Earnings face continued margin pressure, with NII down 1.1% qoq on an 8bp NIM contraction to 1.78%, marking a further decline from the Dec exit NIM of 1.84%, as lower SORA and HIBOR more than offset 0.7% qoq loan growth. This is offset by stronger non-interest income and lower costs, with non-NII up 6.4% qoq led by an 11.3% rebound in other non-NII on seasonally stronger insurance income, while fees are broadly stable. Opex declines 7.0% qoq, driving PPOP growth of 8.2% qoq. We forecast credit costs of 25bps (+1bp qoq) to incorporate a modest management overlay tied to the Middle East conflict, drawing on precedent from 1Q25, when uncertainties around reciprocal tariffs resulted in 1Q25 credit costs of 26bps (higher than previously guided 20–25bps). Overall, ROE improves to 12.3% in 1Q26E.
- **UOB:** We forecast 1Q26 net profit of S\$1,431mn (+1.5% qoq / -4.0% yoy). Earnings are supported by a rebound in non-interest income, partly offset by continued margin pressure and higher credit costs. NII is forecast to decline 0.8% qoq, driven by a 5bp NIM contraction to 1.79%, down from the Jan exit NIM of 1.82%, reflecting lower average SORA and excess liquidity deployed into securities, more than offsetting 0.6% qoq loan growth. Non-NII rises 33.7% qoq, led by a recovery in treasury and trading income and 21.2% qoq fee growth on improved markets activity. Opex increases 3.6% qoq, in line with low single-digit cost guidance, supporting PPOP growth of 14.0% qoq. We forecast credit costs of 34bps (+21bps qoq), incorporating a management overlay tied to the Middle East conflict, drawing on 1Q25 precedent, when tariff-related uncertainty led to credit costs of a similar level at 34bps, above the guided 25–30bps range. Overall, ROE improves modestly to 11.6% in 1Q26E.

Revising estimates

For our Singapore banks coverage, we revise down 2026–28E EPS by up to average c.2%, mainly driven by lower NIMs as we discussed in the previous section. Our two-stage DDM valuation methodology is unchanged. Our target prices for the three banks have been adjusted upwards by 3–7%, incorporating revised earnings forecasts and a lower cost of equity. The decreased cost of equity is due to slight downward adjustment to risk free rate assumption from 2.2% to 2.0% as we marked-to-market Singapore 10 year government bond yield, while our equity risk premium and beta assumptions are unchanged.

Exhibit 17: EPS changes

Company	New EPS estimates			Old EPS estimates			Earnings change		
	2026E	2027E	2028E	2026E	2027E	2028E	2026E	2027E	2028E
DBS	3.85	4.22	4.51	3.93	4.32	4.50	-2.0%	-2.4%	0.2%
OCBC	1.61	1.74	1.84	1.62	1.74	1.81	-0.5%	0.1%	1.6%
UOB	3.18	3.41	3.59	3.24	3.49	3.64	-2.0%	-2.1%	-1.3%
Singapore	2.88	3.13	3.31	2.93	3.18	3.32	-1.5%	-1.5%	0.2%

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for DBS Group, Oversea-Chinese Banking Corp. and United Overseas Bank is/are relative to the other companies in its/their coverage universe: BDO Unibank, BOC Hong Kong (Holdings), Bangkok Bank, Bank Central Asia, Bank Mandiri, Bank Negara Indonesia, Bank Rakyat Indonesia, Bank of East Asia, Bank of Philippine Islands, DBS Group, HSBC Holdings, Kasikornbank, Krung Thai Bank, Oversea-Chinese Banking Corp., SCB X PCL, Standard Chartered Bank, TMBThanachart Bank PCL, United Overseas Bank

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by Goldman Sachs Global Investment Research and referred to in this research.

Goldman Sachs has received compensation for investment banking services in the past 12 months: DBS Group (\$\$57.70)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: DBS Group (\$\$57.70), Oversea-Chinese Banking Corp. (\$\$22.88) and United Overseas Bank (\$\$37.59)

Goldman Sachs has received compensation for non-investment banking services during the past 12 months: DBS Group (\$\$57.70), Oversea-Chinese Banking Corp. (\$\$22.88) and United Overseas Bank (\$\$37.59)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: DBS Group (\$\$57.70), Oversea-Chinese Banking Corp. (\$\$22.88) and United Overseas Bank (\$\$37.59)

Goldman Sachs had a non-investment banking securities-related services client relationship during the past 12 months with: DBS Group (\$\$57.70), Oversea-Chinese Banking Corp. (\$\$22.88) and United Overseas Bank (\$\$37.59)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: DBS Group (\$\$57.70), Oversea-Chinese Banking Corp. (\$\$22.88) and United Overseas Bank (\$\$37.59)

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution		
	Buy	Hold	Sell
Global	50%	34%	16%

	Investment Banking Relationships		
	Buy	Hold	Sell
	65%	60%	45%

As of April 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,074 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at <https://www.gs.com/research/hedge.html>.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for “wholesale clients” within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client’s objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client’s own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs’ Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst – SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: <https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>, and a copy of the annual audit compliance report can be found at this link: <https://publishing.gs.com/content/site/india-annual-compliance-report.html>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for “professional investors” within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom’s departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when

Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES)**. An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS)**. Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS)**. Goldman Sachs has suspended coverage of this company. **Not Covered (NC)**. Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
