

ASIA PACIFIC BANKS

Riding Asia's liquidity wave II; Momentum continues to build

Wealth and liquidity are delivering, momentum persisting

We reiterate our positive view on wealth services, and in line with our Dec 2025 report Riding Asia's liquidity wave; the earnings engine of HK/SG Banks, we note that growth in wealth services across our coverage remains strong and continues to exceed expectations, reinforcing its role as a structural driver of earnings growth and profitability. Wealth services fee income across our coverage grew 25% YoY in FY25 and 23% YoY in 1Q26, with wealth contributing up to ~29% of operating income at STAN — the highest in our coverage. At the same time, abundant liquidity is supporting NII resilience, as banks redeploy excess deposits into higher-yielding assets, helping to mitigate lower rates. Together, this is resulting in a more stable and diversified earnings profile across the sector. We forecast higher wealth fee income CAGR of 14–17% for 2025–28E, contributing to fee income growth of 7–13% CAGR, reinforcing our view that wealth services remain a key earnings driver, leading to broadly higher ROAs. We expect banks with robust wealth management franchises to benefit most, and reiterate our Buy-rating on STAN, HSBC, DBS, and OCBC.

Structural drivers supportive of multi-year growth

This reflects a sustained structural shift with wealth fees rising ~ 5ppt as a share of total fees/non-NII over the past two years, growing at double-digits across covered banks for FY23–25, with wealth ROEs of ~38–60%. The outlook remains supportive with rising Mainland Chinese offshore wealth demand (c.73mn individuals) and high cash allocation (~28%), implying continued reallocation into wealth products as well as growing ASEAN inflows. Hong Kong and Singapore are increasingly consolidating their positions as key cross-border wealth hubs, supported by ongoing capital flows and regional liquidity. These dynamics reinforce the long-term growth runway for both wealth income and system liquidity.

Banks leaning in further, reiterating wealth as a strategic priority

Banks are increasingly leaning into this opportunity. STAN has brought forward its medium-term wealth targets, OCBC has unveiled its wealth growth strategy alongside its Indonesia acquisition, and UOB targets to double wealth income by 2030. HSBC and DBS continue to expand their

affluent franchise, with HSBC highlighting that ~65% of Premier customers remain untapped for wealth products. Importantly, the market appears to be increasingly recognizing this shift, with fee income surprises driving post-results share price reactions, particularly for SG banks.

Key Risks: We highlight some potential headwinds for wealth in the form of: (1) further regulatory tightening on cross-border flows from China to SG/HK; (2) potential slowdown in household wealth accumulation and recovery in the domestic China property market; (3) intensifying competition, which could pressure fee margins while keeping cost ratios elevated amid RM hiring and higher market volatility, which may dampen client investment activity and fee income.

Profitability uplifted by wealth & liquidity trends and still building

Our core thesis remains unchanged: HK/SG banks are in a *different profitability cycle* than prior rate regimes — one increasingly driven by wealth-led fee income and liquidity-led NII resilience, rather than traditional loan growth alone. Since our first publication ([Riding Asia's liquidity wave: the earnings engine of HK/SG Banks](#), Dec 2025), FY 2025 and 1Q26 results further affirm the view with wealth fees across our coverage rising at 25% yoy in FY25 and 23% yoy in 1Q26 across STAN/HSBC and GS-covered Singapore banks and wealth now contributing up to ~29% of operating income at STAN ([Exhibit 3](#)) - highest in our coverage. Liquidity also helped to mute NII compression from falling rates at -6% to +1% yoy growth in FY 2025 despite falling rates (FED -75bps, 3MHIBOR -144bps, 3MSORA -188bps).

Wealth is not only a growth story but a profitability story

What is becoming increasingly clear is that wealth is no longer just a growth contributor, but a key driver of profitability uplift. Wealth fees as a % of total fees/non-NII have expanded by c.5ppt over the past two years ([Exhibit 1](#)) growing at double digit CAGR across banks for FY23-25 ([Exhibit 2](#)). Wealth fee income continues to outpace overall operating income growth, with double-digit wealth fee growth across STAN, HSBC, DBS and OCBC ([Exhibit 36](#)), underpinned by strong net new money inflows, continued affluent client acquisition and deeper product penetration. Management guidance (DBS/OCBC/STAN) continues to point double digit wealth income/ fee growth ([Exhibit 35](#)), and we forecast the wealth fee segment to grow well ahead of group operating income ([Exhibit 4](#)).

Wealth carries structurally higher margins and lower capital intensity. We estimate that wealth ROEs are ~38-60% ([Exhibit 5](#)), well above group-level returns, meaning incremental wealth growth has an outsized impact to ROA/ROE and RORWA. This is already visible in the profitability waterfall: fee income to be accretive to ROA for Singapore banks, HSBC and STAN, through 2028E. ([Exhibit 7](#) - [Exhibit 9](#)).

Liquidity abundance is the second leg and it's holding up

At the same time, liquidity abundance — not only from wealth, but also broader regional corporate and cross-border flows — has become the second leg of profitability support. Banks have been redeploying excess deposits into higher-yielding securities that generate indicative ROEs of 32–60% given minimal risk weights, far above group-level returns. (Exhibit 6). The share of securities and other investments in total assets has risen meaningfully since 2022 across all covered names. Despite rates declining through FY25 and into early 2026, NII compression has been less severe than in prior cycles. STAN and DBS delivered positive NII growth through FY25 (Exhibit 56) — a stark contrast to historical precedent. This combination of liquidity-driven NII support and rising wealth income appears to have produced a more resilient earnings profile than prior rate-cutting cycles, in our view.

Market is increasingly reflecting banks' wealth performance

We are also seeing the market begin to price this shift more directly. Wealth segment performance is becoming increasingly relevant in catalysing share price reactions, particularly for Singapore banks, where fee income surprises are now a key driver of post-results moves (Exhibit 10) with early signs of a similar trend at STAN (Exhibit 11).

Looking ahead, the gap between wealth and group growth is widening. We forecast a wealth fee income CAGR of 15%/14%/17%/17%/16% vs. group operating income CAGR of 7%/5%/4%/3%/3% over 2025–28E for STAN/HSBC/DBS/OCBC/UOB respectively —reinforcing our view that wealth (supported by liquidity-driven NII resilience) remains the primary driver of both earnings growth and profitability uplift over the medium term.

Wealth: Strong end through FY25 and 1Q26 momentum persisting

FY25 ended on a strong footing; 1Q26 off to a robust start with addressable market remaining large

Wealth growth across HK/SG banks remained robust through 2025, supported by sustained North Asia flows — particularly from Mainland China — as well as growing ASEAN inflows. FY25 ended on a strong footing, with wealth fee income growing at an average 25% YoY across our coverage, and 1Q26 marked a robust start with average 23% YoY growth ([Exhibit 20](#)). This is not cyclical — it reflects a deepening structural backdrop with Hong Kong and Singapore continuing to consolidate their positions as the leading cross-border wealth hubs in Asia ([Exhibit 17-Exhibit 19](#)).

Underpinning this is a growing addressable market: the number of Mainland Chinese individuals with offshore wealth needs have risen from 33mn in 2022 to 73mn in 2025 ([Exhibit 12](#)), while ~28% of household assets remain in cash vs ~17% for global peers, implying significant reallocation potential into wealth products over time ([Exhibit 14](#)). Survey evidence also shows Mainland Chinese clients account for a meaningful share of new cross-border client acquisition — with 41–100% of new cross-border clients coming from Mainland China for 60%/38% of HK/SG-based respondents ([Exhibit 13](#)), reinforcing the durability of flow-driven growth. Asia ex-Japan personal financial assets are expected to grow at 7% CAGR through 2030 ([Exhibit 15](#)), with broad-based expansion across wealth segments led by UHNW and mass affluent cohorts ([Exhibit 16](#)).

Differing execution - HSBC leads on scale, STAN on momentum

Flow momentum and client growth remain strong across banks, with clear differentiation in execution.

- STAN delivered the highest AUM expansion (+22% in FY25) and NNM intensity, with 1Q26 NNM of \$18bn (~16% annualised) - well ahead of peers ([Exhibit 23](#), [Exhibit 25](#)).
- HSBC has the largest AUM base of ~\$1.6tn ([Exhibit 22](#)) and cumulative NNM capture of ~\$234bn over 2023–25 ([Exhibit 26](#)), supported by strong new-to-bank (NTB) customer acquisition in Hong Kong — with NTB customers rising sharply to 1.1mn in FY25 ([Exhibit 27](#)). HSBC Asia holds 1.6% market share in APAC financial wealth ([Exhibit 29](#)).
- DBS and OCBC remain well-positioned with steady AUM growth (~15% YoY) and consistent inflows, while UOB continues to lag on NNM pace and deposit-to-AUM conversion.

More broadly, wealth flows remain robust across the system, with healthy NNM/AUM ratios and a continued skew toward affluent and cross-border client segments. We believe this differentiation reflects greater North Asia exposure for HSBC/STAN versus a more balanced but slower trajectory for Singapore banks.

Asia focused banks have richer margins and premiums persist

Importantly, wealth profitability remains structurally superior, supported by higher margins and sustained pricing power. Our analysis shows that Asia-focused banks continue to generate higher wealth income yields vs global peers ([Exhibit 30](#)), likely reflecting (1) More active, transaction-heavy client bases, (2) Stronger skew towards affluent mix and (3) Higher-margin product offerings. Among our covered banks: OCBC leads on overall margins in 1Q26 (~1.7% income/AUM) ([Exhibit 31](#)), while STAN leads on fee yield on invested assets (1.8% in 1Q26) ([Exhibit 32](#)), reflecting a more sophisticated, high-margin product suite. DBS and OCBC have also seen steady improvement in yields, while HSBC screens lower due to mix (AM exposure and lower-risk positioning) but is gradually diversifying its product offering. UOB remains the laggard, with the lowest invested assets/AUM (~42%), reflecting slower monetisation of deposits ([Exhibit 33](#)). Overall, HK/SG banks are delivering ~16% wealth fee CAGR vs ~8% for global peers, underscoring a sustained structural growth premium ([Exhibit 34](#)).

Managements' guidance is broadly consistent; wealth remains the top strategic priority.

Banks are guiding to continued strong growth and have escalated their strategic commitment since our first report:

- STAN has brought forward its medium-term targets, now targeting \$200bn cumulative NNM for 2025-28E and double-digit wealth income growth over 2026-28E.
- DBS maintains mid-teens growth guidance.
- OCBC continues to target double-digit expansion supported by strategic build-out and the acquisition of HSBC's international wealth and premier banking business in Indonesia in May 2026.
- HSBC remains focused on scaling its affluent franchise, noting that ~65% of Premier customers do not yet hold a wealth product — highlighting significant untapped cross-sell potential — though it has removed its explicit double-digit wealth fee growth guidance.
- UOB has outlined a longer-term ambition to double wealth income by 2030 (using 2025 as base year), with initiatives expected to begin showing through from 2H26, including a refreshed customer value proposition, strengthened advisory capabilities, broader product offerings, an expanded RM base, and deeper cross-selling across the wealth continuum ([Exhibit 35](#)).

Taken together, the combination of strong flow momentum, improving execution and structurally higher margins reinforces our view that wealth remains a multi-year, structural growth engine, and a core pillar of earnings growth and profitability uplift across HK/SG banks.

FY26 Wealth Guidance and Strategy	
HSBC	May'26 Investor day: Leading wealth manager in Asia - continue to grow affluent customer base, deepen wealth penetration (~65% of Premier customers do not yet have a wealth product with HSBC), leverage network to support demand for multi-market coverage (present in 8 offshore wealth centers globally). 4Q25: Capture growth in wealth, focusing on Asia and Middle East. Focus on Hong Kong, its role as a cross-border wealth hub continues to deepen. Removed explicit double-digit wealth fee growth guidance.
STAN	May'26 Investor day: Brought forward previously set targets (25-29E) by one year (25-28E) while maintaining the notionals. 1) Cumulative NNM of \$200bn, 2) Wealth income double digit CAGR for 26-28E, 3) Target 75% affluent as a % of WRB income and 4) Maintain \$1.5bn investment over 25-29E period.
DBS	1Q26: Maintain mid-teens growth for wealth. Continue to grow wealth footprint onshore and offshore aggressively. 4Q25: Guided mid-teens growth for wealth in 2026.
OCBC	1Q26: Acquired HSBC International Wealth and Premier Banking in Indonesia. Maintain double-digit yoy growth guidance 4Q25: Announced growth strategy to focus on Wealth and growing ASEAN. Singapore and HK positioned as two key hubs. Establishment of new Group-level wealth committee and focus on providing services to clients across the entire wealth continuum. In ASEAN, expand affluent customer base in Malaysia and grow OCBC Private Bank in Indonesia. Guided double-digit yoy growth in Wealth management in FY26
UOB	1Q26: Announced longer-term ambition to double wealth income by 2030 (using 2025 as base year). Management pointed to initiatives that will begin to show through from 2H26, including a refreshed customer value proposition, strengthened advisory capabilities, broader product offerings, an expanded RM base, and deeper cross-selling across the wealth continuum

Source: Company data

Liquidity: Still abundant, continuing to support NII and returns

Liquidity is a key earnings and ROE support across HK/SG banks, with sustained deposit growth and active balance sheet deployment continuing to support NII build. This dynamic remains important—particularly for Singapore banks where SORA has declined further this year, placing direct pressure on NII. In contrast, while HIBOR has also declined, the move has been less pronounced than SORA, and the relatively stable Fed backdrop has been more supportive. More importantly, we are currently in a steeper yield curve environment, allowing excess deposits to be reinvested at more attractive yields and further supporting NII. As highlighted in our previous report, deposit inflows are another structural earnings driver, and this dynamic remains central in the current cycle. The combination of excess liquidity, favourable rate dynamics and disciplined deployment into securities continues to support NII resilience and reinforces a diversified earnings profile across the sector.

Broad-based inflows continue to drive liquidity across HK and SG

Liquidity inflows remain structurally strong, underpinned not only by wealth deposits but also corporate treasury flows, cross-border capital movements and capital market-related activity, reflecting a broader shift in regional liquidity preferences. This continues to support robust system deposit growth across both Hong Kong and Singapore, reinforcing their roles as key regional liquidity hubs.

In Hong Kong, system deposit growth reached 12% YoY in 2025, with growth in March slightly down to 9% YoY ([Exhibit 38](#)) though still above the 20-year average of 8%. USD-denominated deposits have continued to outpace HKD growth ([Exhibit 39](#)), while cross-border liabilities—particularly those sourced from Mainland China—continue to track at the long-term average ([Exhibit 40](#)). We note capital markets activity has also remained supportive, with a steadily rising IPO pipeline ([Exhibit 48](#) – [Exhibit 49](#)) and strong southbound Stock Connect ([Exhibit 50](#)) flows reinforcing Hong Kong's role as a cross-border fundraising and investment hub.

In Singapore, system deposit growth has similarly remained resilient at 7% in March ([Exhibit 41](#)), with a recent uptick in FX deposit growth likely driven by safe-haven demand ([Exhibit 42](#)), and resident deposits continuing to lead ([Exhibit 43](#)). Cross-border liabilities of Singapore banks have also continued to recover, rising to +2% YoY as of 4Q25 from -5% in 3Q22 ([Exhibit 44](#)).

Liquidity deployment supporting NII and ROEs

This sustained liquidity growth has helped to mute margin compression through FY25 for banks under our coverage. Redeploying excess deposits into higher-yielding securities generates indicative ROEs of 32–60% given minimal risk weights ([Exhibit 6](#)), far above group-level returns of 10–16%. Banks have continued to leverage this dynamic, redeploying surplus liquidity into higher-yielding securities, which has been a critical offset to NIM pressure during the rate-cutting cycle. Despite

rates declining through FY25 and into early 2026, NIM compression has been less severe than in prior cycles, supported by proactive balance sheet management and effective deposit repricing, particularly at STAN and DBS, which delivered positive NII growth through FY25 ([Exhibit 56](#)).

At the bank level, deposit growth remained broad-based in 1Q26 ([Exhibit 51](#)). STAN continued to lead with the strongest uptick, while DBS and OCBC maintained solid momentum. UOB lagged, reflecting their strategic focus on LDR management and NIM preservation. USD deposits remained a key driver across most banks ([Exhibit 53](#)), while wealth and retail deposits continued to outpace group-level growth for STAN and HSBC ([Exhibit 54](#)), and similarly for DBS and OCBC on the retail side ([Exhibit 55](#)). Banks have also continued to shift their asset mix towards securities, with the share of securities and other investments rising meaningfully since 2022 across all covered names ([Exhibit 57](#)).

NII outlook is diverging - with liquidity providing extra growth/cushion

For HK-focused banks (HSBC, STAN), the outlook is relatively more constructive. HIBOR has held up better than SORA, the Fed outlook remains stable, and a steeper yield curve ([Exhibit 60](#)) supports wider investment spreads on securities portfolios. HSBC has guided to FY26 Banking NII of ~\$46bn (up from prior guidance of at least \$45bn), with scope to beat if the curve remains steep. STAN expects NII broadly flat YoY at constant currency ([Exhibit 62](#)).

For SG banks, NII will still face pressure from lower SORA—with 3M SORA now at ~1.2%—making liquidity dynamics more critical as an earnings offset. DBS has guided FY26 NII slightly below 2025 levels (assuming rates remain at current levels with 1.00% SORA and high single-digit deposit growth), while OCBC expects a slight to moderate NII decline (assuming 3M SORA of ~1.2% and one Fed cut in 4Q26). UOB has guided NIM of 1.75–1.80% ([Exhibit 62](#)). We forecast NII growth to turn positive for DBS and OCBC from FY27, with UOB following a similar trajectory ([Exhibit 61](#)).

We forecast deposit growth to remain above historical averages. Our estimates: 8%/4%/10%/4%/8% for STAN/HSBC/DBS/UOB/OCBC in 2026E, moderating to 5%/6%/8%/5%/6% in 2027E and 4%/4%/6%/5%/5% in 2028E ([Exhibit 59](#)). Management teams across our coverage continue to signal sustained deposit momentum, supported by cross-border inflows, wealth diversification demand and corporate treasury consolidation.

Liquidity is the second pillar of the profitability story. The combination of sustained deposit growth, a steeper yield curve and disciplined balance sheet management reinforces our conviction that liquidity-driven NII support will remain a key earnings and ROE differentiator in this cycle, even as headline NIM faces near-term pressure from lower policy rates.

FY26 NII Guidance as of 1Q26	
HSBC	Expect FY26 Banking NII of ~\$46bn, (previous guidance at least \$45bn) reflecting an improved interest rate outlook, while recognising the outlook remains volatile and uncertain. • Based on mid-April 2026 expectations for policy rates
STAN	FY26 NII expected to be broadly flat YoY at ccy (unchanged from previous quarter)
DBS	FY26 NII slightly below 2025 levels (unchanged from previous quarter) despite revised lower rates assumptions. • Assumptions: Rates assumed to remain at current levels (1.00% SORA) and high single-digit deposit growth vs. previous 1.25% SORA and 2 Fed Cuts
OCBC	FY26 NII slight to moderate decline (unchanged from previous quarter) despite revised lower rates assumptions. • Current: 3M SORA of ~1.2%, 1 Fed Fund Rate cut in 4Q26 and 3M HIBOR of ~2.7% vs. previous 3M SORA of ~1.4%, ~3.5% Fed Fund Rate and 3M HIBOR of ~2.8%
UOB	NIM guidance: 1.75-1.80% (unchanged from previous quarter)

Key Risks

1. Further regulatory tightening on cross-border flows

A meaningful portion of the wealth thesis is anchored on the expanding role of Hong Kong and Singapore as cross-border hubs, alongside continued growth in the Mainland Chinese offshore wealth pool. Any slowdown in China's growth trajectory, tighter capital controls, or regulatory tightening on cross-border wealth movement could dampen this driver. Focus on potential for a crackdown on offshore capital flows has increased following the release of the *"Implementation Plan for the Comprehensive Rectification of Illegal Cross-Border Securities, Futures, and Fund Business Activities"* by the China Securities Regulatory Commission (CSRC), which aims to curb illegal capital outflow channels and strengthen supervision of banks involved in cross-border investment flows. While banks under our coverage are traditional institutions with established compliance processes, including KYC and source-of-funds checks, further regulatory tightening from the China side could still weigh on cross-border flows and pose downside risk to the wealth theme.

2. Potential slowdown in household wealth accumulation and recovery in the domestic China property market

Recent China April activity data surprised to the downside, marking the largest miss since May 2023, with industrial production, retail sales, and fixed asset investment all falling short of market expectations. That said, our economists are not overly concerned, as the weakness appears to be driven by a range of temporary and macro/sector-specific factors (read our China economist [piece](#) for more). However, we note any deterioration in China's growth outlook could slow cross-border wealth flows into Singapore and Hong Kong. In addition, a [recovery](#) in the China property market could slow down outflows, as wealth investors could turn their investment attention back to the property market, particularly given that property remains the primary asset allocation for Chinese households at around 52%.

3. Intensifying competition in wealth management and higher market volatility

Intensifying competition in wealth management could lead to pressure on fee rates as banks seek to attract and retain clients. In addition, increased competition to hire relationship managers may drive higher costs and keep cost-to-income ratios elevated in this segment. Furthermore, wealth fees are linked to client investment activity; higher market volatility and a more risk-off environment could dampen client investment demand and reduce fee income.

Price Target Risks and Methodology

Price Target Risks and Methodology - HSBC Holdings (HSBA.L)

We are Buy rated. Our 12-month price target of GBP1,700 is based on a P/E methodology, using a 12.0x target multiple applied 75%/25% to our 2027/28E EPS forecasts, vs an average target multiple of c.10.5x for our European Banks coverage, reflecting in part various structural advantages held by HSBC, including its deposit-centric growth (capital-light income, with associated hedge benefits), across a range of supportive regions/products, alongside meaningful opportunities for non-NII growth via the Wealth segment. Downside risks include: 1) Weaker-than-expected Banking NII, including faster-than-expected Fed rate cuts, or a widening gap between HIBOR and Fed rate; 2) Slower-than-expected non-NII growth, including a potential slowdown in global trade or increased competition from peers; 3) Reversal/pause of positive operating efficiency trajectory if simplification efforts are impacted adversely.

Price Target Risks and Methodology - HSBC Holdings (0005.HK)

We are Buy rated. Our 12-month price target of HK\$165 is based on a two-stage DDM. Downside risks include: 1) Weaker-than-expected Banking NII, including faster-than-expected Fed rate cuts, or a widening gap between HIBOR and Fed rates; 2) Slower-than-expected non-NII growth, including a potential slow down in global trade or increased competition from peers; 3) Reversal/pause of positive operating efficiency trajectory if simplification efforts are impacted adversely.

Price Target Risks and Methodology - Standard Chartered (STAN.L/2888.HK)

We are Buy rated. Our 12-month price target for 2888.HK of HK\$242 is based on two-stage DDM-based price target. For STAN.L, our 12m P/E-based price target is 2,260p, and we continue to use a multiple of 10.25x applied 75%/25% to our 2027/28E EPS forecasts. Downside risks to our view and price target include reversal/pause of positive jaws delivery, slower-than-expected non-interest income growth, lower-than-expected net interest income growth.

Price Target Risks and Methodology - DBS Group

We are Buy-rated on DBS with a 12-month target price of S\$68.3 (based on two-stage DDM). Key downside risks: (-) Unexpected acceleration in rate cuts; (-) Unexpected asset quality deterioration; (-) Mismanaged top management transition.

Price Target Risks and Methodology - Oversea-Chinese Banking Corp.

We are Buy rated on OCBC with a 12-month target price of S\$25.3 (based on a two-stage DDM). Key risks include: (-) Sudden or sharper-than-expected Fed cut cycle; (-) Changes in strategy to return capital; and (-) Unexpected dilutive M&A activity.

Price Target Risks and Methodology - United Overseas Bank

We are Neutral rated on UOB with a 12-month target price of S\$41.7 (based on two-stage DDM). Key risks include: (-) Unexpected acceleration or deeper Fed rate cuts; (-) Unexpected asset quality deterioration; (+) Stronger than expected growth in fee income.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes

investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at <https://www.gs.com/research/hedge.html>.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: <https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>, and a copy of the annual audit compliance report can be found at this link: <https://publishing.gs.com/content/site/india-annual-compliance-report.html>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage

Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances.

Early-Stage Biotech (ES). An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or contatogoldmanbrasil@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
