1Q25 – inline quarter; more confident on NIMs and AQ than growth

Maintain Rating: BUY | PO: 44.00 SGD | Price: 34.98 SGD

1Q25 – inline across line items; fee strength positive

UOB reported 1Q25 net profit of S\$1.5 bn (-2% QoQ/0% YoY) - in line with our expectations driven by higher credit costs (35 bp), partially offset with strong fee income (19.7% YoY growth), stable NIMs (2.00%), healthy loan growth (1.0% QoQ), and cost discipline (42.6% CIR). Overall, a stable quarter with NIM resilience as key standout. The bank remains quite watchful in the current environment. At this stage, mgmt. expects tariff-related impact to be restricted to growth risks. See more levers to further defend NIMs close to current levels. On AQ, no impact showing up yet, but bank will remain conservative in building up GP buffers further. Maintain Buy on attractive valuation.

Tariff impact – key comments across drivers

NIMs – see more levers to defend NIMs – despite benchmark rates falling, NIMs were stable as UOB optimized its balance sheet (LDR +1% pt), managed wholesale deposit costs, and continued to improve funding franchise (CASA ratio +0.5% pt). 1Q25 exit NIMs at 1.98% - mgmt. still has levers to pull, impact from UOB One deposit rate cuts only surfacing in 2Q and 3Q onwards + further BS optimization.

Growth – visibility remains low – there is a lot of noise in current numbers as many customers have front loaded flows to avoid tariff impact. Impact from tariff related uncertainties might start showing up only from 3Q onwards.

Asset quality – to build more GP buffers – Underlying AQ trends remain intact (new NPAs in 1Q mainly from HK RE account). Mgmt. is not seeing any impact on its loan book yet, but will be prudent in strengthening NPL coverage in this uncertain environment (GP reserves to likely go up 0.9% of loans from 0.8% now with no specific timeline). The bank is now significantly de-risked compared to previous cycles with focus on ASEAN-China trade corridor. Key exposures as % of book – SME 10%, trade loans 10%, customers with higher exposure to US 2%. Even under a stress case, overall provision impact likely to be much lower than during COVID.

Company Sector

Banks-Multinational/Universal

Company Description

UOB has a well established SME and mass affluent consumer banking platform in Singapore. It is controlled by the Wee family. UOB has a diversified regional footprint across Singapore, Malaysia, Indonesia, Thailand and China. The UOB Group has a network of more than 500 offices in 19 countries and territories in Asia Pacific, Western Europe and North America.

Investment Rationale

We rate UOB Buy. As we enter the rate cut cycle, UOB's lower NIM sensitivity, scope for higher contribution from ASEAN businesses, better wealth management yields and operating efficiency seem under-appreciated by the market. We expect positive surprises on two fronts - a rebound in ASEAN contribution and a more vibrant regional wholesale business. Hence we expect DBS's valuation premium over UOB to narrow.

Analyst call – key highlights

NIM

- **1Q25 NIMs stable QoQ at 2.00%** – margin pressures from lower loan yields due to lower benchmark rates were offset by balance sheet optimization and lower cost of funds.
- **~2.00% FY25 NIM guidance suspended** – NIM sensitivity has fallen to 1.2 bp per every 25 bp rate cut (down from 1.6 bp in past few quarters), while 1Q25 exit NIM was 1.98%. Positive impact from UOB One deposit rate cut will only flow through from 2Q25 results onwards (full impact from 3Q25 as cut was implemented in May).
- **Other tools** – UOB has also been proactively managing its wholesale bank deposit book (which contributed to lower funding costs in 1Q25), and will continue to do so. LDR also rose slightly to 84%, and management stated they will continue to manage liquidity position to help maintain NIMs.

Growth

- **1Q25 loan growth healthy** – loans grew at 1.0% QoQ / 5.7% YoY, and was broad based across segments and industries.
- **High single-digits FY25 growth guidance suspended** – first order impact of tariffs on UOB remains limited – only 10% of loan book are trade loans, and only 20% of these trade loans have U.S. exposure (effectively 2% of entire loan book). Management noted no significant drop off / spikes in activity, and are more concerned with second order impacts (slower growth, regional economic activity etc.)

80+% of trade loans are focused on the ASEAN-China trade corridor, which may even see increased activity post-tariffs.

Non-II

- **1Q25 non-II growth healthy at 7.5% YoY** – driven by a 19.7% YoY increase in fee income (WM: 29.9% YoY, cards: 10.6% YoY, loan-related: 27.9% YoY).
- **WM AUM stable at S\$189 bn** – S\$1.5-2bn net new money (lower QoQ due to seasonality) for the quarter offset by lower investment returns.

Cost efficiency – 1Q25 CIR in line with guidance at 42.6%

Asset quality

- **1Q25 credit costs rose to 35 bp** – in line with our expectations but higher than what the street expected. Specific provisions fell to 19 bp, but UOB taking a very prudent stance by recording 16 bp of general provisions to strengthen coverage going into this uncertain macro environment.
- **Underlying asset quality trends intact** – NPL ratio edged up slightly to 1.6% (from 1.5% the quarter prior), largely due to idiosyncratic HK real estate account that has already been provisioned for.
- **25-30 bp FY25 credit costs guidance suspended** – management does not see massive AQ deterioration on the level of previous crises (AFC, GFC, COVID), but remains prudent in managing its loan book and provisions.

GP provisions / total loan book is at 0.80% as of 1Q25 – management has signaled intentions to raise this figure to 0.90%, implying a further ~S\$300 mn worth of general provisions, but gave no specific timeline.

Capital – no change to capital management policies

BofA GLOBAL RESEARCH

Price objective basis & risk

United Overseas Bank (UOVEF / UOVEY)

Our PO of S\$44.00 (US\$65.32) is derived using a Gordon growth model, which assumes a sustainable ROE of 13.0%, cost of equity of 9.6%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 1.4x.

Downside risks: protracted global economic slowdown, significant asset quality deterioration and high employee/customer attrition from announced acquisition of Citi's consumer banking operations in Thailand, Indonesia, Malaysia and Vietnam. Upside risks: stronger than expected macro recovery and better than expected pick-up in rate cycle.

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1867	54.40%	Buy	1108	59.35%
Hold	774	22.55%	Hold	466	60.21%
Sell	791	23.05%	Sell	368	46.52%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2}Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.
