Feedback from the Asia Seminar

The flows into Hong Kong whether via new to bank customers in wealth, Asia trade flows or RMB internationalization, paints a stronger for longer growth picture for HSBC in the region. A simplified and more agile structure on top of that, puts 20% ROTE increasingly on the cards 2028E.

Wealth growth outlook remains strong. The IPO pipeline in Hong Kong is playing a role in the strong Net New money flows in Q1. With c. 500 companies waiting to list, momentum is likely to be strong short term, and HSBC flagged that Q2 activity remains strong. More structurally, the wealth creation coming from the mainland, the increasing allocation of savings to financial products, and the international diversification, leaves a strong growth outlook for flows for the foreseeable future with HK expected to become a larger wealth hub than Switzerland and Singapore before 2029.

HSBC also has room to increase wallet share. Non-resident new customers from China mainland are up 3x in 2025 vs. 2023 and make up the lion share of the 1.1mn new customers in Wealth. Management see their total addressable market in HK including mainland clients at 70mn vs. 7mn today. Considering the 35% savings rate in China, and that it typically takes 36months for clients to "mature", HSBC should be reaping the benefits of the customer growth the next couple of years. Investment in the product pipeline should also play a role in increasing the wallet share, with management noting 65% of Wealth clients don't have wealth products despite a 35% savings ratio.

Supply chain restructuring a key driver behind activity in CIB. The Asia trade corridor is now the biggest in the world, Investments behind that supply chain and trade are significant drivers of longer term loan growth. China mainland clients are using more products in more geographies and are now 2x more profitable for the banks. The 9% growth in CIB deposits also speaks to the quality of the business that is being captured, 80% of which is transactional accounts. We are assuming a slowdown in the growth to 4% by year end, but so far there are no signs of a slowdown in activity.

The \$1.5bn simplification gains will be largely done by Q2. The company has come a long way simplifying its structure, with the CEO explaining \$1.4bn of the \$1.5bn savings promised early 2025 are now largely done, 6 months ahead of schedule. There are more savings coming from Hang Seng and further streamlining of the operating model which will be re-invested in the model.

Asset quality outlook improving in HK CRE. Hang Seng had 100bp of CoR in 2025, however with Residential prices up 5%, retail spend up 10% in 2months, and vacancies coming down, the CRE cycle seems to have bottomed. This should give the market confidence group CoR will come down to 40bp or lower in outer years. No quick solutions to reduce NPLs, however with clearing prices starting to happen

the direction of travel should be positive, and should facilitate capital efficiency measures medium term.

We see upside risk to numbers. Activity levels remain strong, and in the absence of a Middle East shock, we believe there is upside to Wealth and CIB fees as we flagged in our recent note ([HSBC: A Pathway to 20% ROTE \(13 May 2026\)](#)). However on 1.7x TBV 2027E for a 19-20% ROTE 2028E we don't see enough upside to turn buyers.

Risk Reward – HSBC (HSBA.L)

High-teens RoE and capital returns make it defensive. Equal-weight.

PRICE TARGET 1,463p

Our PT is based on a probability weighted methodology (bull 30%, base 65%, bear 5%, based on the likelihood of different macro outcomes). Scenario values are based on a 3-stage Gordon Growth Model adding the NPV of 5 year forecast dividend, to the NPV of 10 year implied dividends during a fade period and a terminal book value. We assume a CoE of 10% and terminal growth rate of 2.5%.

RISK REWARD CHART

Source: Refinitiv, Morgan Stanley Research

EQUAL-WEIGHT THESIS

- Rising rates have driven NIM higher. The rate cycle has now peaked, leading to NIM headwinds, but non-interest income growth and capital returns mean RoTE can stay above 17%.
- We have increased confidence in non-interest income growth (especially in wealth, but also in corporate banking). We also see continued cost control, with medium-term cost growth of c.3%.
- We see HSBC maintaining a 50% payout ratio, and share buybacks of c.US\$7-12bn from 2026 onwards. Capital returns will likely further support the share price.
- Macro and geopolitical risks remain, but we expect capital returns and fee growth to provide support for the share price.

BULL CASE

1,773p

Costs well controlled

Global macro sentiment improves as oil price falls. Global growth supported by AI productivity gains, and rates and NIMs remain high. Revenues accelerate faster than in base case, yet HSBC still delivers 3% cost growth post 2026e. Macro risks abate, CoE 9.3%.

BASE CASE

1,366p

Rate rises follow Fed curve; risks abate

Geopolitical tensions means uncertainty in global growth. Loan growth remains subdued, although we still see structural growth in fees. Costs remain well controlled.

BEAR CASE

787p

Rising macro risks

Hard landing leads to fall in US rates to 2.5% and HSBC's NIM comes under more severe pressure. HSBC struggles to control costs and cost:income remains elevated. Macro and geopolitical risks increase. CoE 13.5%

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in

Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report. Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1546	42%	467	51%	30%	709	44%
Equal-weight/Hold	1568	43%	358	39%	23%	715	44%
Not-Rated/Hold	4	0%	0	0%	0%	1	0%
Underweight/Sell	555	15%	84	9%	15%	202	12%
Total	3,673		909			1627	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.
