

Oversea-Chinese Banking Corp. (OCBC.SI): 2Q26 First Take: Strong beat all round; guidance raised

OCBC posted 2Q26 net profit of S\$2,221mn, up 22% yoy/13% qoq, above GSe (+13%). The strong results were driven by: **(1) Robust Non-NII** (+24% vs GSe) supported by **strong fee income** (+27% yoy, +9% vs GSe) from better than expected WM fees (+12%qoq/+44% yoy) with growth other fees as well. **Insurance income was also robust** at +69% yoy and **other non-NII was also robust** supported by large non customer flow trading/investment income. AUM +2% in 2Q26; **(2) NII was also decent (+1% vs GSe)**, though NIM was weaker than expected -6bps qoq offset by robust loan growth at +5%qoq/+12%yoy. Deposit growth was decent at 3% qoq/13% yoy; **(3) Credit cost was below GSe** at 18bps mostly coming SPs of 12bps, OCBC continues to set aside allowance driven by heightened macro uncertainties in Indonesia. NPL ratio flat at 0.9% with new NPA formation in corporate offset by higher write-offs with continued decline in consumer NPAs. NPA coverage remains stable at 163% while GP coverage fell slightly to 0.8%. **(4) CET 1 on a fully phased-in basis fell to 14%** from 15.2% on strong RWA growth of 6% qoq and payment of final and special dividend. OCBC announced an interim dividend of 47 cents for 1H26, a dividend payout ratio of 50%.

OCBC 2026 raised guidance:

- (+) NII to have slight decline from slight to moderate decline (GSe -0.2% yoy);
- (+) Total income to grow from stable to growing (GSe of 4.0%);
- (+) High-single to low double digit from mid-single digit loan growth (GSe 5.4%);
- (=) Credit cost around 20-25bps (GSe 22bps);
- (=) CIR of low to mid 40% (GSe 40.6%);
- (=) 50% ordinary dividend payout ratio; Complete S\$2.5bn capital return by FY26.

Overall, the results represent a **clear earnings beat**, underpinned by **strong fee income momentum across wealth and insurance and better than expected NII**. The stock has already performed well, driven by a visible acceleration in WM-led fee growth since **3Q25** and the expectation that this momentum can be sustained. We believe today's results further strengthen that narrative, lending confidence to OCBC's ability to execute on wealth. From a market perspective, this should be supportive for the share price. We look forward to further colour at the **media and analyst briefing at 10.30am** and will focus on how management sees the growth trajectory evolving from here.

Goldman Sachs does and seeks to do business with companies covered in its research reports. Key highlights:

- **Net interest income was broadly in line with GSe (+1%), at S\$2.26bn (+2% qoq/-1% yoy)**, supported by a **5% increase in average interest-earning assets** driven by growth in both loans and high-quality assets, which more than offset lower loan yields and higher wholesale funding costs. Customer loans grew 5% qoq/+12% yoy (+5%/+11% in constant currency terms), with broad-based growth across corporate and consumer, as well as across geographies.
- **NIM declined by 6bps qoq to 1.70%**, modestly below GSe (-2bps), largely due to downward repricing of loans and higher wholesale funding costs, partly offset by higher treasury yields.
- **Non-interest income beat GSe by 24% (+51% yoy / +19% qoq) at a record S\$1.91bn**, supported by broad-based growth across fee, trading and insurance income. Fee income (**+10% qoq/+28% yoy**) was led by record wealth management fees as well as stronger loan, trade-related and investment banking fees. Trading income (**+60% qoq/+85% yoy**) benefited from record customer flow income and higher investment income from GEH following the equity market recovery, while insurance income (**-7% qoq/+68% yoy**) reflected robust underlying insurance and investment performance.
- **NPL ratio was stable qoq at 0.9%**, with new corporate NPA formation partly offset by recoveries, upgrades and write-offs during the quarter. The new NPA formation was mainly from downgrades of two Greater China corporate real estate accounts under special mention. Total NPA coverage remained unchanged at **163%**, while performing loan coverage eased to **0.8%** from **0.9%** due to a larger loan base.
- **Credit cost came in lower at 18bps** (vs. GSe 20bps) below GS, with total allowances declining **28% qoq** to **S\$156mn**, primarily due to lower non-impaired allowances. Allowances in the quarter were largely driven by impaired asset provisions, while management overlays were maintained for macroeconomic uncertainties in Indonesia.
- **Expenses came in 7% higher than GSe (+5% qoq / +13% yoy)**, reflecting performance-linked remuneration and continued investments in talent and technology. CIR improved to 37.8% from 39.3% in 1Q26.

Our 12-month target price (2-staged DDM based) for OCBC is S\$32.0. Key risks: (-) Sudden or sharp FED cut cycle; (-) Unexpected dilutive M&A activity. Remain Buy.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data

feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
