1Q25 – in-line qtr; front-loading NIM pass-through versus peers

Maintain Rating: BUY | PO: 19.50 SGD | Price: 16.16 SGD

1Q25 – NIM miss offset by better opex and provisions

OCBC reported 1Q25 profits of S\$1.9 bn (12.1% QoQ/-4.8% YoY) – broadly in line as 11 bp NIM contraction QoQ was offset by benign credit costs (26 bp), steady loan growth (1% QoQ), healthy non-ll growth (10% YoY) and opex control (cost-inc 39%). 1Q net new money inflow of S\$5 bn was the best among peers.

2025 guidance maintained – around 2.00% NIMs (1Q25 exit NIM 2.03%), mid-single digit loan growth, CIR in low 40s, 20-25 bp credit costs, 60% total payout ratio.

Overall, a steady qtr with the bigger NIM decline the key delta versus peers – we believe this is more of a classical pass-through of rate cycle, while peers are using a more synthetic approach (hedges) to smoothen pass-through. This might mean OCBC NIMs start outperforming by 2H25. Maintain Buy on attractive valuations / defensive yields.

Drivers – candid commentary on tariff impact

NIMs – 2025 exit NIMs likely below 2% – 1Q25 NIM declined more pronounced due to higher allocation into NII accretive but NIM dilutive HQLA + less hedged book. Mgmt. reiterated guidance of ‘around’ 2.00%, with 1Q25 exit NIM at 2.03%. Improvements to cost of funding from deposit rate cuts will start to show in 2Q (offsetting some of the pressure from SORA/HIBOR pass-through), but likely to only fully materialize in 3Q.

Growth – low confidence on guidance – mid single-digit guidance reiterated, but CEO admitted that this is most at risk if macroeconomic picture turns sour.

Asset quality – 3% of book more exposed to US-China trade – underlying AQ trends remain intact with NPL ratio stable at 0.9%. Mgmt. feels comfortable with current level of GP buffers after this quarter’s 15 bp top-up but will continuously evaluate given volatile backdrop. Key exposures as % of book – SME 9%, trade loans 10%, 3% of book in industries with first order impact (two-thirds of book exposed to customers who depend more on local demand).

Capital – no change to capital mgmt. policies – 60% total payout ratio & buybacks.

Company Sector

Banks-Multinational/Universal

Company Description

OCBC is the second-largest bank group in Singapore by total assets. OCBC differs from local Singapore banking peers as it has a large life insurance business (88% of SGX-listed Great Eastern Holdings). It has a diversified presence across ASEAN and Greater China. In 2010, it acquired the Asian private banking assets of ING Asia Private Bank and has since rebranded it as Bank of Singapore. In 2014, Wing Hang Bank became a wholly owned subsidiary, expanding the group's Greater China operations.

Investment Rationale

We rate OCBC Buy. As we enter the rate cut cycle, OCBC's lower NIM sensitivity, scope for higher contribution from ASEAN businesses, better wealth management yields and operating efficiency seem under-appreciated by the market. OCBC's management revamp and renewed strategic plan focused on regional flows & wealth management will likely positively surprise over next 1-2 years, in our view. We also expect positive surprises on dividends. Hence we expect DBS's valuation premium over OCBC to narrow.

Key takeaways from analyst call

NIM

- **1Q25 NIMs contract 11 bp QoQ to 2.04%** – largely driven by lower asset yields from lower benchmark rates (as a result of four US Fed rate cuts in 4Q24, and high pass-through to SORA).
- **Strategic move in HQLA largely completed** – 1Q25 NIM compression was more pronounced in OCBC than peers due to OCBC's deployment into NII accretive but NIM dilutive HQLA assets, a strategic move that is mostly completed in 1Q.
- **~2.00% FY25 NIM guidance reiterated** – NIMs expected to fall from 1Q25 exit of 2.03%, as falling SORA in 1Q continues to impact asset yields in the SGD loan book (only 20+% of SGD book is fixed rate). Lower funding costs from deposit rate cuts will partially show up in 2Q25, but full impact likely to only materialize in 3Q.
Guidance is based on three more US Fed rate cuts, and normalization of pass-through effect to local rates (SORA, HIBOR).

Growth

- **1Q25 loan growth stable at 0.9% QoQ** – driven by new economy sectors in Singapore, U.S., and U.K.
- **1st order impact of tariff war affects 3% of loan book** – 3% of loan book in high-risk industries such as manufacturing, international transport / logistics.
- **Mid-single digit FY25 growth guidance reiterated** – OCBC will continue to focus on its franchise businesses (new economy sectors such as data centres, green economy etc.), but conceded that growth guidance is most at risk of being revised if global uncertainty surrounding tariffs worsen.

Non-II

- **1Q25 non-II growth healthy at 10.2% YoY** – driven by an 18% YoY increase in WM fees – AUM increased by S\$6 bn to S\$306 bn; 60% invested. OCBC also recorded healthy growth in trading and insurance income.

Cost efficiency

- **1Q25 CIR in line at 38.7%** – mgmt. continues to exercise cost discipline, and is confident of achieving FY25 CIR guidance of low 40s.

Asset quality

- **1Q25 credit costs at 26 bp** – consisting of 15 bp of GP on conservative provisioning. Underlying asset quality trends remain intact (NPA ratio unchanged at 0.9%), but mgmt. decided to add on to overlays out of prudence as macroeconomic situation remains volatile.
- **20-25 bp FY25 credit costs guidance reiterated** – mgmt. is comfortable with the current level of general allowances, but will have to continuously evaluate as the macroeconomic situation evolves.

Capital

- Capital mgmt. policies of 60% total payout ratio & share buybacks unchanged

Price objective basis & risk

Oversea-Chinese Banking Corp (OVCHF)

Our PO of S\$19.50 is derived using a Gordon growth model, which assumes a sustainable ROE of 13.0%, cost of equity of 9.6%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 1.4x.

Downside risks: protracted global economic slowdown, a significant deterioration in the asset quality environment, and volatility of its insurance and trading income. Upside risks are better than expected macro recovery, and higher leverage from more active capital management.

Sell	48	23.30%	Sell	38	79.17%

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1867	54.40%	Buy	1108	59.35%
Hold	774	22.55%	Hold	466	60.21%
Sell	791	23.05%	Sell	368	46.52%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or

financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.
