Bottom line: We hosted Jean Fernandes – CFO, Wealth & Retail Banking at STAN at our Asia Financial Corporate Day on Jan 13th, 2026 which provided valuable insights into how the business is managed, what differentiates them from peers, and key drivers of its continued growth. The discussions highlighted disciplined execution, curated product offerings, and the added advantage of multi-jurisdictional banking capabilities supporting the ability to attract net new money and enhance client stickiness. Against this backdrop, management expressed confidence in its ability to further capture market share and enhance competitive strength in Asia over time.

Key takeaways

- **AUM growth supported by strong net new money and effective client up-tiering.** STAN observed sustained strong net new money inflow in 2025, supported by strong inflow across its key international booking centers and major client cohorts, specifically Chinese, Indian, and ASEAN overseas clients, who seek multi-jurisdictional banking services. STAN expects to enhance competitive strength in Asia over time. In addition to new to bank, STAN noted that client up-tiering is another strong source of AUM growth. STAN is effectively migrating clients through its wealth segments, from Premium (above \$25K) to Priority (above \$100K), or further to Priority Private (above \$1mn), signifying strong client stickiness. Furthermore, the up-tiering helps to bolster wealth income, as clients in higher tiers typically engage with more sophisticated product offerings and exhibit increased trading volumes, leading to a significantly higher income multiple over their AUM.
- **Focus on mortgage and margin lending.** Among the lending products in WRB, STAN has deliberately reduced exposure to unsecured lending and preferred mortgages and wealth lending, which the bank sees as more complementary to the core business. From a risk management perspective, the inherently collateralized nature of these lending products results in a significantly lower

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. RWA density compared to the group average, thereby enhancing capital efficiency. This approach also underpins the maintenance of robust asset quality within the wealth portfolio. With this strategy, group business delivered 4% loan growth in 9M25 YTD, primarily benefiting from a recovery of the mortgage market and stronger market sentiment.

- **Cost management remains a focus.** While wealth management businesses are generally characterized by a higher CIR compared to other traditional banking segments, STAN notes that the CIR of its affluent business is lower than the group level, driven by the utilization of a common infrastructure, fostering significant economies of scale across its holistic wealth business. Looking forward, STAN expects to further enhance operating efficiency and drive productivity improvements via various digital efficiency programs, including AI-driven contact center transformation, physical branch network optimization, and RM efficiency enhancement with AI tools, etc.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company neither has a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
