Higher NPA formation re-emerges as the key debate

Maintain Rating: BUY | PO: 50.00 SGD | Price: 43.58 SGD

2Q26: Underlying trends mixed; one-off supports earnings

UOB reported 2Q26 net profit of S\$1.48bn (+3% QoQ/+10% YoY), slightly ahead of expectations, largely driven by S\$200mn of asset disposal gains. Underlying trends were mixed. NII declined 2% YoY and missed consensus as NIM compressed 8bp QoQ to 1.74%, while fee income growth remained modest at 5% YoY. Non-II income rose 15% YoY, supported by asset divestment gains and resilient customer treasury income. Overall, we view the result as broadly in-line, with earnings holding up despite continued margin pressure. We maintain Buy on less demanding valuations, alongside potential upside from wealth growth acceleration and stabilizing rates in 2H.

Asset quality remains the key focus from here

NPL ratio increased to 1.6% (1.5% in 1Q26), driven primarily by the downgrade of a closely monitored Greater China real estate account. Greater China NPA formation increased by c.S\$0.6bn QoQ, with roughly two-thirds coming from a single exposure. GP coverage fell to 0.9%, raising questions around whether this may need to be rebuilt over time. We think investor focus will remain on whether the latest Greater China downgrade proves idiosyncratic or indicative of further asset quality pressure ahead.

Hits, misses

Hits – stable growth – 1) loan growth came in healthy at 2.1% QoQ, driven by wholesale banking and trade-related lending. 2) Wealth fees reached a record high, while customer treasury income remained resilient. **Misses – underlying AQ deterioration, NIM contraction** – 1) NPL ratio rose slightly to 1.6% in 2Q26, largely driven by the downgrade of a singular Greater China CRE account that was already provisioned for. SP was slightly elevated at 39 bp, partially offset by some GP writebacks; 2) NIMs contracted 8 bp QoQ, driven by continued pressure on asset yields. 3) FY26 fee income growth guidance was lowered to LSD, reflecting softer card and IBG-related fee growth.

Company Sector

Banks-Multinational/Universal

Company Description

UOB has a well established SME and mass affluent consumer banking platform in Singapore. It is controlled by the Wee family. UOB has a diversified regional footprint across Singapore, Malaysia, Indonesia, Thailand and China. The UOB Group has a network of more than 500 offices in 19 countries and territories in Asia Pacific, Western Europe and North America.

Investment Rationale

We rate UOB Buy. As we enter the rate cut cycle, UOB's lower NIM sensitivity, scope for higher contribution from ASEAN businesses, better wealth management yields and operating efficiency seem under-appreciated by the market. We expect positive surprises on two fronts - a rebound in ASEAN contribution and a more vibrant regional wholesale business. Hence we expect DBS's valuation premium over UOB to narrow.

Analyst call – key highlights

NIM

- **2Q26 NIMs contract 8 bp QoQ to 1.74%** – driven by a 5 bp decline in asset repricing and -2 bp effect from unfavorable mix changes, and a 1 bp increase in funding costs.
- **FY26 1.75-1.80% NIM guidance reiterated** – on the premise of stable US and SGD benchmark rates through the rest of the year.

Growth

- **2Q26 loan growth stable at 2.1% QoQ** – in line with system trends. Growth continues to be driven by tech / new age sectors, and regional trade.
- **FY26 low single digits guidance reiterated.**

Non-II

- **2Q26 non-II growth 14.9% YoY** – driven by a 4.6% YoY growth in fees and a one-time ~\$200 mn disposal of property. Fee growth was largely slower than peers, driven by increased credit cards rewards redemption, slower IB fees, and a weaker wealth franchise (albeit growing at 29% YoY).
- **FY26 high single digit fee growth guidance revised down to low single digits** – largely driven by slowing momentum in the cards and IB fee segments.

Cost efficiency

- **CIR rose to 45.3%** (vs. 44.3% a year ago) on weaker top-line, while opex growth remains relatively stable at 6% YoY.
- **FY26 low-single digit opex growth guidance reiterated** – core spending on tech, infrastructure, compliance to continue. Headcount likely to remain stable – higher headcount in PB segment offset by natural attrition in other segments.

Asset quality

- **2Q26 credit costs 28 bp** – consisting of 39 bp SP, partially offset by a 11 bp writeback in GP.

UOB continued to observe stress in Greater China RE-related accounts, which saw an additional ~\$0.4 bn in NPA formation related to a singular Greater China CRE account.

Overall, NPL ratio ticked up to 1.6% as a result, with underlying asset quality trends in other regions remaining relatively healthy.

- **FY26 total credit costs 25-30 bp guidance reiterated**

Price objective basis & risk

United Overseas Bank (UOVEF / UOVEY)

Our PO of S\$50.00 (US\$77.33) is derived using a Gordon growth model, which assumes a sustainable ROE of 11.5%, cost of equity of 7.6%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 1.65x.

Downside risks: protracted global economic slowdown, significant asset quality deterioration and high employee/customer attrition from announced acquisition of Citi's consumer banking operations in Thailand, Indonesia, Malaysia and Vietnam. Upside risks: stronger than expected macro recovery and better than expected pick-up in rate cycle.

Sell	41	18.89%	Sell	32	78.05%

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1987	56.11%	Buy	1190	59.89%
Hold	797	22.51%	Hold	496	62.23%
Sell	757	21.38%	Sell	391	51.65%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2}Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.
