Feedback from the Asia Seminar

Flows into Hong Kong – whether via new to bank customers in Wealth, Asian trade flows, or RMB internationalization – paint a "stronger for longer" growth picture for HSBC in the region. On top of that, a simplified and more agile structure makes 20% ROTE increasingly likely by 2028E.

Wealth growth outlook remains strong: The IPO pipeline in HK played a role in 1Q's strong net new money flows. With c.500 companies waiting to list, momentum is likely to be strong short term; 2Q activity remains strong. More structural forces (wealth creation coming from the mainland, increasing allocation of savings to financial products, and international diversification) support a strong flows growth outlook for the foreseeable future. Boston Consulting Group expects HK to become a larger wealth hub than Switzerland before 2029.

HSBC also has room to increase wallet share: Non-resident new customers from mainland China have tripled since 2023, accounting for most of the 1.1mn new Wealth customers. Management sees TAM in HK (including mainland clients) at 70mn vs. its current customer base of 7mn. Savings rate in China is 35%, and clients typically take ~36 months to "mature," so benefits should materialize over the next few years. Investment in the product pipeline should also help in increasing wallet share, with management noting 65% of Wealth clients don't have wealth products.

Supply chain restructuring a key driver behind activity in CIB: Asia is now the largest trade corridor globally. Thus, investments in supply chains and trade are significant drivers of longer-term loan growth. Clients from mainland China are using more products in more geographies and are now 2x more profitable for HSBC. FY25 9% growth in CIB deposits underscores the quality of the business that is being captured, 80% of which is in transactional accounts. We assume that growth slows to 4% by year-end – but so far, there are no signs of a slowdown in activity.

The promised US\$1.5bn in simplification gains will be largely achieved by 2Q: The company has come a long way in simplifying its structure. The CEO stated that US \$1.4bn of the US\$1.5bn in savings promised in early 2025 are now largely done, six months ahead of schedule. There are more savings coming from Hang Seng Bank and further streamlining of the operating model.

Asset quality outlook improving in HK CRE: Despite 100bps CoR for Hang Seng Bank in 2025, rising residential prices (+5%), stronger retail spending (+10% in two months), and falling vacancies suggest that the CRE cycle has bottomed. This should give the market confidence that group CoR will come down to 40bp or lower in outer years. NPL resolution will be gradual, but emerging clearing prices point to improving conditions and better medium-term capital efficiency.

We see upside risk to numbers: Activity levels remain strong, and in the absence of another Middle East shock, we see upside to Wealth and CIB fees, as we flagged in our recent report. Potential earnings upside keeps us OW H-shares (0005.HK).

Risk Reward – HSBC Holdings (0005.HK)

High-teens RoE and strong capital returns keeps us Overweight.

PRICE TARGET HK\$155.20

Our PT is based on a probability weighted methodology (bull 30%, base 65%, bear 5%, based on the likelihood of different macro outcomes). Scenario values are based on a 3-stage Gordon Growth Model adding the NPV of 5 year forecast dividend, to the NPV of 10 year implied dividends during a fade period and a terminal book value. We assume a CoE of 10% and terminal growth rate of 2.5%.

RISK REWARD CHART

OVERWEIGHT THESIS

- Rising rates have driven NIM higher. The rate cycle has now peaked, leading to NIM headwinds, but non-interest income growth and capital returns mean RoTE can stay above 17%.
- We have increased confidence in non-interest income growth (especially in wealth, but also in corporate banking). We also see continued cost control, with medium-term cost growth of c.3%.
- We see HSBC maintaining a 50% payout ratio, and share buybacks of c.US\$7-12bn from 2026 onwards. Capital returns will likely support the share price.
- Macro and geopolitical risks remain, but we expect capital returns and fee growth to provide support for the share price.

BULL CASE

HK\$188.10

Costs well controlled

Global macro sentiment improves as oil price falls. Global growth supported by AI productivity gains, and rates and NIMs remain high. Revenues accelerate faster than in base case, yet HSBC still delivers 3% cost growth post 2026e. Macro risks abate, CoE 9.3%.

BASE CASE

HK\$144.90

Rate rises follow Fed curve; risks abate

Geopolitical tensions means uncertainty in global growth. Loan growth remains subdued, although we still see structural growth in fees. Costs remain well controlled.

BEAR CASE

HK\$83.50

Rising macro risks

Hard landing leads to fall in US rates to 2.5% and HSBC's NIM comes under more severe pressure. HSBC struggles to control costs and cost:income remains elevated. Macro and geopolitical risks increase. CoE 13.5%

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1546	42%	467	51%	30%	709	44%
Equal-weight/Hold	1568	43%	358	39%	23%	715	44%
Not-Rated/Hold	4	0%	0	0%	0%	1	0%
Underweight/Sell	555	15%	84	9%	15%	202	12%
Total	3,673		909			1627	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.
