

Standard Chartered

Playing to its strengths

Rating Change: NEUTRAL | PO: 1,800 GBp | Price: 1,669 GBp

Upgrade to Neutral, growth upside balanced by valuation

We upgrade Standard Chartered to Neutral from Underperform and raise PO to 1800p from 1,475p. The company has done well, particularly in Asia Wealth Management, however the share price has done even better – despite limited consensus upgrades for 2025e-2027e at the pre-provisional level this year, shares re-rated more than the sector. We think upside and downside risks are balanced at this point – Wealth growth could be even stronger (albeit we are already above consensus by c.3-4%), and there could be one-off gains in the Ventures business (which we do not currently forecast given low visibility). However, we also see downside risks in costs – assuming below the line restructuring costs fall significantly in 2027 as per management guidance implies total cost would be falling in absolute terms, which would be unusual for a bank that is still aiming to grow revenues.

Wealth growth continues, helped by differentiated products

Wealth has been one of the key growth drivers for Standard Chartered. Front end flows continue to be strong and given a 6-12 month time lag between account opening, deposit funding, and deployment into wealth products, we think 2026 would be another strong year. Standard Chartered has been particularly successful in creating products with travel and lifestyle related benefits that are differentiated, and highly valued by the target customers. Combined with a highly visible marketing campaign, we think they will continue to be successful in attracting new customers. We expect 13-17% Wealth fee income growth in 2026e and 2027e, c.3-4% above consensus.

Valuation in line even assuming mid-teens ROTE

Consensus is currently expecting just under 14% underlying (i.e. ex restructuring) ROTE in 2025. We think it is possible that Standard Chartered could be making mid-teens underlying ROTE in the medium term (we forecast c.15% for 2027-2028, consensus c.14% for 2027), and we expect this to be a key focus at the Asia investor seminar in May. However, with shares now trading at c.9x FY26e P/E and c.1.2x P/TBV26e, this is in line with the sector which is trading at an average of 1.3x P/TBV26e for c.16% ROTE.

Company Sector

Banks-Multinational/Universal

Company Description

Standard Chartered is headquartered in London, but its major operations are in Asia and Africa, with a diverse footprint within these continents. Standard Chartered has three main divisions, including Wealth and Retail Banking, Corporate and Institutional Banking, and Ventures. The shares are listed in both London and Hong Kong in a dual primary listing.

Investment Rationale

We rate Standard Chartered Neutral. We expect Wealth growth to remain strong, and management has been successful in terms of creating differentiated products that are highly valued by their target customers. There is potential downside on NII in a falling US rate environment. We also see downside risk to cost, particularly below the line. Shares are not expensive, but also not obviously cheap versus the sector.

Wealth: Continue to drive growth

Standard Chartered's revenue profile is split roughly 50:50 NII and non-NII. Non-NII growth has been driving most of the growth.

Exhibit 1: Total revenue split by income lines, 2025e

Deposits and mortgages, and Wealth Solutions make up about one third of total income

Standard Chartered's franchise is heavily focused on Asia and the Middle East

Source: Company presentation

BofA GLOBAL RESEARCH

The Wealth business in particular has been one of the key growth drivers for Standard Chartered. Front end flows continue to be strong and given a 6-12 month time lag between account opening, deposit funding, and deployment into wealth products, we think 2026 would be another strong year.

Exhibit 3: Net new money average per annum (\$bn)

Net new money flows in 2025 already exceeds target in the first three quarters

Source: Company presentation

BofA GLOBAL RESEARCH

Assume net new money flows continues to grow at a similar pace

At a high level, we expect the flows to be sustainably strong in the foreseeable future. In our view, two factors helped to support the strong Wealth Management performance. Firstly, because the Hong Kong dollar is pegged to the USD, Hong Kong rates have been higher than those in mainland China, driving wealth inflows into Hong Kong. Secondly, there has been large demand for investment diversification, especially with the significant outperformance of offshore assets vs China onshore assets, particularly property, traditionally a popular vehicle for investments for middle-class families.

Our China and Asia Economist Helen Qiao expects monetary policy to remain loose – see [China Viewpoint: 2026 Year Ahead: Policy stimulus and trade conflict hold the key to stable growth 24 November 2025](#).

While a near-term policy rate cut appears unlikely due to persistent concerns about banks' net interest margins (NIM), we expect the easing cycle to resume as early as in late-2Q26. Softer growth momentum in Q1, coupled with a possible shift in the Federal Reserve's policy stance toward rate cuts, could present the opportunity for the PBoC to lower rates-potentially by 20bp via OMO over the course of the year. In addition, RRR cuts are also likely to support accelerated local government bond issuance, aligning with broader fiscal expansion objectives.

Exhibit 4: PBOC 7day repo rate vs Fed Funds Rate (%)

Rate differential widened in 2023 as the US entered rate rise cycle (China rates were c.2% higher pre rate rise, but c.3.5% lower by Aug-23 when US rates peaked)

BofA GLOBAL RESEARCH

HK Exchange turnover remaining high and likely to remain high in 2026

Hong Kong Exchange saw particularly high turnover in 2025. The global market liquidity improvement made Hong Kong a key beneficiary, particularly after the weak turnover over the past 2-3 years. This was supported by the revival of IPOs, which made HKEX reach the top of global exchanges.

While our analyst for HKEX Michael Li thinks that the high base leaves limited room for further increase of turnover in 2026, the overall liquidity environment can continue to be supportive to the current market turnover level. See [HKEX: 2026 outlook: from liquidity to products 27 November 2025](#).

Exhibit 5: Hong Kong Exchange turnover (HKD million)

Turnover was elevated in 2025, even outside of periods of particularly high volatility (e.g. Liberation Day)

Source: Bloomberg

BofA GLOBAL RESEARCH

Southbound flows expected to continue

Southbound turnover increased >150% YoY in 2025 and accounted for 24% of the total Hong Kong turnover, up from 17% in 2024, also the highest in the history. The differences compared with previous years might be due to the participation of more insurance funds seeking high-dividend-yield stocks in Hong Kong when the domestic asset yields went lower. We expect the inflow to continue into 2026, but if

China holds its interest rates, instead of cutting further, additional inflow may not be strong, vs. the already high base.

Investment and differentiated products focused on travel and lifestyle supporting market share gains

Standard Chartered has been on the front foot when it comes to investing in their Asia Wealth business. As a reminder, at Q324 they committed to investing \$1.5bn over 5 years in their mass affluent business, which comprises of 50% in people, and 25% each in digital/ technology and brand, marketing and client centers.

These investments have supported product propositions that are creative and differentiated. For example, they have doubled down on their travel rewards proposition, a key attraction to mass affluent customers.

On top of a credit card partnership with Cathay Pacific, the flagship carrier of Hong Kong, they have expanded mileage rewards in other banking products, including deposits, payroll accounts, wealth management etc.

Eliza Law, Head of Affluent Segment and Distribution, press interview Apr-25 –

“Our Priority Banking services are constantly evolving to meet the needs of the affluent clients who are eager to earn miles. The survey reveals that nearly half HNWIs have earned miles through banking services, standard such as setting up time deposits, payroll accounts, and wealth management. The number of affluent clients setting up Asia Miles Time Deposit with large deposits continues to rise, with some clients earning over 4 million miles within a year through banking services. Furthermore, earning miles through payroll accounts has become a new trend, allowing clients to easily enhance their next journey simply by receiving their salary.”

Exhibit 6: Standard Chartered Affluent Travel Study 2025

Standard Chartered commissioned surveys in 2024 and 2025 to understand travel preferences and behaviours of HNWI (high-net-worth) individuals

Source: Company social media

BofA GLOBAL RESEARCH

These product launches are also complemented by a marketing campaign that targets travellers – for example the first rollout of the 'Now's Your Time for Wealth' campaign in January 2025 ran in a mix of out-of-home advertising across airports and in-city sites, print advertising, film and content partnerships with leading international, regional and local media across the seven key markets – Singapore, Hong Kong, mainland China, Korea, Taiwan, UAE, and India.

BofA GLOBAL RESEARCH

Medium term – path to mid-teens ROTE

Management has committed to providing medium term financial guidance in May, at the Asia investor seminar.

We think it is possible that management could guide to mid-teens ROTE for the medium term. We currently forecast c.14-15% ROTE for 2028. We have made the following high-level assumptions:

Interest rate: US rate stabilising at c.3%

Loan growth: 3-4%

Deposit growth: 4-5%

Wealth growth: 13-16% per year in 2026-2028 (consensus 11-13%)

Tax rate: 27.5% from 2027 (consensus 28-29%)

Upside risk (i) – Wealth

As discussed in the section above, Wealth remains a strong growth engine. In 2024 and 2026 growth rates have been in the high 20s%. If this is repeated clearly there would be more upside, however we note that market conditions were highly favourable – and accounts for almost half the AUM growth.

Upside risk (ii) – Ventures

The Ventures business incorporate Standard Chartered's digital banks in Hong Kong (Mox) and Singapore (Trust), as well as other investments in private companies and joint ventures.

While we do not currently forecast gains on sales in the Ventures business, we nevertheless think this could be a source of upside, potentially via gain on sale, or recognising a marked-to-market gain.

Management currently guides to a cumulative loss of less than \$200m in the business, but in Q3 alone the loss was \$110m. Run rate loss for the business has been c.\$100m per quarter in the last eight quarters, excluding the Solv India gain recognized in Q2 this year.

Bill Winters, CEO, Q325 presentation – ‘Yes, I'm going to add income growth to the top of the line, we'll have ongoing expense management as we've had. And while lumpy and less predictable in terms of the timing, we'll see gains on sale as well. So we remain committed to our cumulative loss target in Ventures over the planning period.’

Updates on key businesses within the Ventures business:

- Mox and Trust – Expected to turn profitable in 2026
- Zodia Markets (digital asset platform) – raised \$18.25 million in a Series A funding round in September 2025 (see company press release)
- Olea (supply chain finance platform) – secured a \$100m warehouse financing facility

Other businesses include

- Zodia Custody (institutional custody for cryptoassets and tokenised assets)
- Libeara (Asset tokenisation platform for Fund and Asset Managers)
- SWIAT (On-chain market infrastructure platform for Financial Institutions)
- Rippe (Blockchain payments network, crypto custody and prime brokerage)

Downside risk (i) – Cost

We have noted in the past that Standard Chartered is one of the few UK/ European banks that still reports restructuring charges below the line. While there are inevitably

one-off costs in any given year, most banks have been able to absorb them within their core cost line.

The current Fit for Growth programme is expected to have a cost to achieve (CTA) of c.\$1.5bn. The programme is made up of c.200 grassroots programmes that drive benefits ranging from a few hundred thousand dollars all the way to tens of millions of dollars. 80% of the projects individually delivered less than \$10 million in estimated annual benefits.

While we agree these are worthwhile cost initiatives, they are BAU costs not one-off restructuring charges, in our view. Most banks have cost efficiency programmes running on a day-to-day basis.

We do note that HSBC also has restructuring charges in 2025/2026, but they largely relate to severance cost, as management aims to reduce duplication of roles following a drive to simplify the organizational structure. We believe these high-profile severance programmes are more one-off in nature.

Exhibit 8: Restructuring charge as a proportion of total income

Standard Chartered is one of the few banks that continue to report a restructuring charge below the line

Source: Company reports, BofA Global Research estimates

BofA GLOBAL RESEARCH

Management has been clear that the Fit for Growth programme will not bleed into 2027 and beyond. While we expect a relatively low restructuring charge in 2027 – as it would be important for management credibility, we see some risks to the cost profile in 2028 and beyond.

Exhibit 9: Operating cost including below the line restructuring

Restructuring costs are expected to fall significantly in 2027e post the fit for growth programme, implying an absolute cost reduction on an all-in basis

Source: Company reports, BofA Global Research

BofA GLOBAL RESEARCH

Valuation not expensive but already re-rated

Momentum in fee income growth remains strong, and we expect new targets given at FY25/ Asia investor seminar scheduled for May-26 to be positive catalysts.

However, the stock has already re-rated significantly in the year. Comparing company aggregated post Q424 and post Q325 consensus, underlying EPS for 2026 and 2027 only increased by c.4%, and lower for reported EPS given higher restructuring charge estimates.

Exhibit 10: Consensus estimate changes, post Q425 to present

Pre-provision operating profit estimates increased by 3% since start of year, reported EPS broadly flat given higher restructuring charges

Exhibit 15: Valuation using Gordon growth model

Our fundamental valuation suggests a PO of 1,800p per share

	Value per share
2027E RoTE	14.5%
CoE	12%
Growth	3.5%
Book multiple	1.3x
Book multiple discounted to 1 year from now	1.2x
2026E tangible book value	1869
Value pre capital distributions (\$)	2168
Add back: dividends	161
Excess capital to 13%	69
Fundamental valuation (cents)	2398
Fundamental valuation (GBp)	1800

Source: BofA Global Research estimates

BofA GLOBAL RESEARCH

Cost of equity: We have reduced our cost of equity from 12.5% to 12%, in line with the assumption we use for other UK banks. This reflects lower geopolitical risks given lower trade tension particularly between the US and China.

Growth: We have increased our growth rate from 3% to 3.5%, reflecting growth trajectory in Asia Wealth.

Price objective basis & risk

Standard Chartered (SCBFF / SCBFY)

Our primary valuation methodology is a Gordon Growth Model based on our 2027e forecast, to which we add the present value of expected dividends. With a 12% cost of equity assumption, this suggests a price to book multiple of 1.3x, reducing to 1.2x when discounted to a year from now at our cost of equity. Applying this to 2026E tangible book value of 1,869c gives a value of 2,168c pre capital return. To this we add the dividends we forecast through to 2027E (also discounted), and adjust for excess capital to the bottom end of management guidance. Using this valuation approach, we arrive at a price objective of 1,800p (47.88 USD).

The upside risks to our PO are: 1. US rates stay higher for longer, terminal rate higher than expected, 2. further stimulus from the Chinese government, 3. Emerging Asia/ Hong Kong loan growth recovers faster than expected.

The downside risks to our PO are: 1. Loan growth remains subdued for longer, 2. Wealth Management flows slow as competition intensifies in the market, 3. Global trade flows reduce more than expected with higher tariffs.

Analyst Certification

I, Perlie Mong, hereby certify that the views expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or view expressed in this research report.

Special Disclosures

BofA Securities is currently acting as Joint Financial Advisors to HSBC Holdings PLC in connection with the proposed privatization of Hang Seng Bank Limited, which was announced on October 9th 2025. The proposed transaction is subject to approval by shareholders of Hang Seng Bank Ltd. This research report is not intended to provide voting advice, serve as an endorsement of the proposed transaction, or result in the procurement, withholding or revocation of a proxy.

Light grey shading indicates the security is not covered. Chart is current as of a date no more than one trading day prior to the date of the report.

Equity Investment Rating Distribution: Banks Group (as of 30 Sep 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	112	53.33%	Buy	91	81.25%
Hold	50	23.81%	Hold	39	78.00%
Sell	48	22.86%	Sell	39	81.25%

Equity Investment Rating Distribution: Global Group (as of 30 Sep 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1816	53.11%	Buy	1062	58.48%
Hold	825	24.13%	Hold	480	58.18%
Sell	778	22.76%	Sell	385	49.49%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2}Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Standard Chartered.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Standard Chartered.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Standard Chartered.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Standard Chartered.

In the US, retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale: Standard Chartered.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Standard Chartered.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Standard Chartered.

BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Standard Chartered.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Standard Chartered.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

This information is prepared for the use of BofA Securities clients and may not be redistributed, retransmitted or disclosed, in whole or in part, or in any form or manner, without the express written consent of BofA Securities. This document and its content is provided solely for informational purposes and cannot be used for training or developing artificial intelligence (AI) models or as an input in any AI application (collectively, an AI tool). Any attempt to utilize this document or any of its content in connection with an AI tool without explicit written permission from BofA Global Research is strictly prohibited. BofA Global Research utilizes AI, including machine learning and other technologies, to enhance the services we provide to our clients. These technologies assist our analysts in various aspects of their work, including but not limited to data analysis, content extraction, content creation, data aggregation and summarization and identifying relevant information from diverse sources. All AI-driven processes are subject to review by BofA Global Research employees. BofA Global Research information is distributed simultaneously to internal and client websites and other portals by BofA Securities and is not publicly-available material. Any unauthorized use or disclosure is prohibited. Receipt and review of this information constitutes your agreement not to redistribute, retransmit, or disclose to others the contents, opinions, conclusion, or information contained herein (including any investment recommendations, estimates or price targets) without first obtaining express permission from an authorized officer of BofA Securities.

Materials prepared by BofA Global Research personnel are based on public information. Facts and views presented in this material have not been reviewed by, and may not reflect information known to, professionals in other business areas of BofA Securities, including investment banking personnel. BofA Securities has established information barriers between BofA Global Research and certain business groups. As a result, BofA Securities does not disclose certain client relationships with, or compensation received from, such issuers. To the extent this material discusses any legal proceeding or issues, it has not been prepared as nor is it intended to express any legal conclusion, opinion or advice. Investors should consult their own legal advisers as to issues of law relating to the subject matter of this material. BofA Global Research personnel's knowledge of legal proceedings in which any BofA Securities entity and/or its directors, officers and employees may be plaintiffs, defendants, co-defendants or co-plaintiffs with or involving issuers mentioned in this material is based on public information. Facts and views presented in this material that relate to any such proceedings have not been reviewed by, discussed with, and may not reflect information known to, professionals in other business areas of BofA Securities in connection with the legal proceedings or matters relevant to such proceedings.

This information has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any

securities. None of BofAS or any of its affiliates or their research analysts has any authority whatsoever to make any representation or warranty on behalf of the issuer(s). BofA Global Research policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

Any information relating to sustainability in this material is limited as discussed herein and is not intended to provide a comprehensive view on any sustainability claim with respect to any issuer or security.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

The information herein (other than disclosure information relating to BofA Securities and its affiliates) was obtained from various sources and we do not guarantee its accuracy. This information may contain links to third-party websites. BofA Securities is not responsible for the content of any third-party website or any linked content contained in a third-party website. Content contained on such third-party websites is not part of this information and is not incorporated by reference. The inclusion of a link does not imply any endorsement by or any affiliation with BofA Securities. Access to any third-party website is at your own risk, and you should always review the terms and privacy policies at third-party websites before submitting any personal information to them. BofA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities' ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
