2Q25 – strong and inline; WM AUM flows shifting to even higher gear

Reiterate Rating: BUY | PO: 50.00 SGD | Price: 48.85 SGD

2Q25 – strong non-ll offsets NIM headwinds

DBS reported 2Q25 profit of S\$2.8 bn (-2.8% QoQ/+0.8% YoY) – driven by resilient non-ll/fee income (+10-11% YoY), and benign AQ (13 bp credit costs), partially offset by headline loan contraction (-0.6% QoQ) and NIM contraction (-7 bp QoQ). Overall, another strong set of results with strength across line items. The key positive surprise in our view was the increase in private bank net new money quarterly runrate to S\$9 bn from S\$5-6 bn before. This highlights the strength of regional wealth flows and DBS' ability to gain market share = structurally higher contribution of WM business. DBS also appears to be much ahead of peers on the digital asset business. Management remains confident on capital mgmt. plans for next 2-3 years (24c step-up + 60c special annually).

Reiterate Buy with PO S\$50 – Valuations (especially 6%+ yield) still look very attractive despite the recent outperformance. (see our recent report - [Banks - Singapore: Benchmarking with global peers – DM sector with EM characteristics 24 July 2025](#)).

Hits & misses – lower NII offset by non-ll, healthy AQ

Hits – strong WM + trading, benign AQ – 1) quarterly trading income hit a multi-year high amid market volatility + WM fees rose 25% YoY on larger AUM base / healthy client activity in May through June (sustained in July as well), resulting in non-ll growth of 10.4%; 2) benign asset quality despite global headwinds resulting in 13 bp credit costs with sufficient GP to weather any negative surprises.

Misses – headline loan growth -ve, NIM pressure from regional rates – 1) Loans contracted 0.6% QoQ driven by FX translation (constant currency loan growth 1% QoQ); 2) NIMs contracted 7 bp QoQ driven by lower asset yields from sharp declines in SORA and HIBOR rates. Overall, on FY NII basis, lower asset yields from lower benchmark rates expected to be fully offset by lower deposit costs and volume growth (loans, deposits and HQLA). The bank also managed to re-instate some of the hedges in 1H.

Company Sector

Banks-Multinational/Universal

Company Description

DBS Group is Singapore's largest bank, owned 30% by the Singapore government's Temasek Holdings unit. DBS purchased Dao Heng Bank in HK in 2001. In Singapore, it has traditionally been strong in corporate and consumer lending. DBS also has a growing presence in Greater China, Southeast Asia and South Asia. DBS has over 280 branches across 18 markets in Asia.

Investment Rationale

We rate DBS Buy. Current valuation premium is well deserved given DBS's superior capital allocation and execution across key business segments. Higher-for-longer rates are also likely to help DBS sustainably deliver close to all time high ROEs and deserving cyclical high PB multiples.

Key takeaways from analyst call

NIM

- **2Q25 NIMs contracted 7 bp QoQ to 2.05%** – driven by 13 bp decrease in commercial book NIMs on sharp declines in HIBOR and SORA rates + continued NIM dilutive HQLA allocation, partially offset by higher markets trading NIMs due to lower funding costs.
- **June exit NIM 1.98% (July 1.95%)** – Safe haven deposits inflow will continue to enable DBS to accrete cheap deposits, which will be deployed into NII accretive but NIM dilutive HQLA. Overall, on FY NII basis, lower asset yields from lower benchmark rates expected to be fully offset by lower deposit costs and volume growth (loans, deposits and HQLA).

Cash flow hedges put in place have an average tenor of 3Y, with maturities well spread out. The bank is still getting a 60-70 bp step-up on newly rolled over hedges (replacing hedges put on years ago when rates were still lower than current environment).

Growth

- **2Q25 underlying loan growth stable at 1% QoQ** – headline loan growth - 1% on FX translation. China/HK loan growth remains muted but offset by large non-trade corporates in SG.
- **Loan pipeline intact** – 2H loan pipeline looks relatively healthy, continuing to be driven by domestic / regional growth in TMT (data centres), renewable infrastructure, real estate and financial institutions. Mgmt. also noted that clients are starting to resume previously paused investment plans, albeit with risk premiums priced in.

Non-II

- **2Q25 non-II growth healthy at 10.4% YoY** – driven by a 11.4 % increase in fee income (WM +25%). WM momentum remains strong, with HNW/UHNW net new money of S\$9 bn (total net new money at S\$12 bn including DBS Treasures).
- **FY25 mid to high single digit commercial book growth guidance** – driven by continued outperformance in WM segment. CEO noted that there is an increasing need for estate planning amid record high generational wealth transfer in Asia, with much of the growth in fee income driven by bancassurance (high double digit YoY growth).

Cost efficiency

- **2Q25 CIR in line at 39.6% - low 40s FY25 CIR guidance reiterated**

Asset quality

- **2Q25 credit costs of 13 bp** – mgmt. not seeing any trends of AQ deterioration, but continues to carry out stringent stress tests.
- **17-20 bp FY25 SP guidance reiterated** – underlying AQ trends remain healthy with NPL ratio at 1.1% (reported NPL fell to 1.0%).

Capital

- **15c capital return dividend per share per quarter in FY25** – mgmt. remains confident of continuing the annual 24 cent step up in base dividends for the next 2 years + 15c capital return dividend per quarter for the next 3 years.

BofA GLOBAL RESEARCH

Price objective basis & risk

DBS Group (DBSDF / DBSDY)

Our PO of S\$50.00 (US\$153.21) is derived using a Gordon growth model, which assumes a sustainable ROE of 16.0%, cost of equity of 9.0%, and a long-term growth rate of 2.0%. This implies a warranted PBV of 2.0x.

Downside risks to our PO are: protracted global economic slowdown and a significant deterioration in the asset quality environment. Upside risks to our PO are: better than expected macro recovery, faster-than-expected execution of digital strategy boosting operational efficiency, and more active capital management.

Sell	44	21.78%	Sell	35	79.55%

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2025)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1840	53.64%	Buy	1081	58.75%
Hold	807	23.53%	Hold	472	58.49%
Sell	783	22.83%	Sell	375	47.89%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2}Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein.
