DBS Group Holdings | Asia Pacific

Research Tactical Idea

We believe the share price will fall relative to the industry over the next 30 days.

This is because of an earnings release. Whilst the underlying business at DBS remains strong, normal seasonal 4Q weakness in upcoming results, plus full valuation, could result in short-term weakness.

We estimate that there is about a 70% to 80% (or "very likely") probability for the scenario.

Estimated probabilities are illustrative and assigned subjectively based on our assessment of the likelihood of the scenario.
