Bottom line:

We hosted OCBC's investor relations team at our Asia Financial Corporate Day today. Overall, the tone was cautiously optimistic, with OCBC maintaining guidance while acknowledging an uncertain rate and macro environment. Discussions during the call centered on wealth momentum and evolving Chinese cross-border regulations, alongside NII evolution, asset quality and contribution momentum from Great Eastern Holdings. OCBC highlighted that (1) wealth remains a key growth driver, with limited near-term impact from tighter cross-border rules; (2) insurance momentum remains intact though noting 1Q benefited from one-off items; (3) NII is expected to decline year on year as per guidance but could remain relatively stable sequentially; and (4) asset quality remains stable with no immediate concerns.

Key takeaways:

- **Wealth continues to be a key focus**, with momentum sustained into 2Q. Management noted that while recent Chinese cross-border regulatory developments have introduced additional checks, including stricter declarations on source of funds, the impact so far has been limited. Most Chinese client assets are sourced offshore, and the bank's exposure to onshore Hong Kong flows remains relatively small, which helps mitigate near-term disruption. While some moderation could be seen in June as policies are digested, the broader wealth growth trajectory remains intact, supported by ongoing investment in propositions and cross-jurisdiction capabilities.
- **Insurance continues to show steady underlying momentum**, although 1Q results were supported by one-off items related to release in reserve. OCBC indicated that while such items are not expected to repeat, the underlying trajectory remains positive, with structural growth supported by improved product positioning and continued integration within the broader wealth platform.
- **Net interest income (FY) is expected to decline year on year**, as per guidance,

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. reflecting lower average rates, although sequential quarterly NII trends could remain relatively stable if rate conditions hold. NIM continues to be driven primarily by SORA, with pressure expected to persist but at a more gradual pace. OCBC highlighted that balance sheet positioning, liquidity levels and funding mix optimisation remain key levers, alongside disciplined loan growth in a cautious macro environment.

- **Asset quality remains stable**, with no signs of deterioration observed across the portfolio. Current provisioning buffers are viewed as adequate based on internal stress testing, and OCBC does not see a need for additional provisions at this stage. Exposure to Indonesia has been managed more conservatively, with limited growth and continued focus on risk control.

Price Target Risks and Methodology – Oversea-Chinese Banking Corp.

We are Buy rated on OCBC with a 12-month target price of S\$25.3 (based on a two-stage DDM). Key risks include: (-) Sudden or sharper-than-expected Fed cut cycle; (-) Changes in strategy to return capital; and (-) Unexpected dilutive M&A activity.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
