Upgrading EPS on stronger revenues; Feedback from mgmt meetings

We hosted CFO Diego De Giorgi for investor meetings following 3Q results (see [here](#)), and remain constructive on the revenue trajectory and ROTE path across the medium term. *We highlight key feedback below.* We update our forecasts and increase EPS by 3-6% across FY25-27E driven by stronger revenues and lower provisions in 25/26E. As a result, we increase our PT to 1770p. We also introduce 2028 forecasts and expect the Adj ROTE path to trend towards 14.0% by 28E, with more detail expected to be shared with the target refresh in May '26. Overall, we remain OW with the stock trading on 7.7x PE, 1.0x PTNAV for a ROTE of 13.8% 27E, and we expect an additional \$1.5bn SBB to be announced with FY results.

- **We increase our FY25 NII forecasts to \$11.0bn** (-1% y/y) and in line with mgmt guidance for a LSD% decline, following the stronger performance in 3Q. We expect quarterly NII to flatten in 4Q given the better rate trajectory alongside continued volume growth. We continue to expect NII to decline by 1% in FY26E with the Group's currency-weighted average curve now expected at 285bps in FY26E (vs 340bps FY25E for a 55bps decline y/y) and CIB deposit betas expected to normalise over time.
- **We forecast total income growth of 7% FY25E**, in line with mgmt guidance, with non-NII growth of +17%. We see 4Q non-NII at +6% y/y and a slower pace compared to 9M25 (+15% y/y) given the stronger base in 4Q24 particularly in Markets, although with Wealth (+19% y/y) momentum continuing. We expect net new money growth to be seasonally weaker in 4Q (JPMe c\$11bn vs c\$13bn 3Q), but see the Group on track for its LT targets of \$250bn in 5Y (vs \$42bn YTD).
- **ROTE progression to continue across the medium term** at 13.8% 25E and ahead of c13% targets, but dipping slightly to 13.5% 26E given slower revenue growth and normalising impairments. However, we see ROTE progressing towards 13.8%/14.0% 27/28E which we expect to be the focus of the target refresh in May '26, as the Group continues to pivot towards Affluent revenues within Retail, while CIB income and returns become more sustainable (e.g. higher proportion of flow-related income in Markets).

Feedback from management meetings

- **Competition in the Wealth segment:** The Affluent segment is typically low cost to service, low cost to acquire and anchored to a core product (e.g. mortgage, life insurance). Therefore, competition in the Affluent segment is largely against DBS, Citi and HSBC rather than UBS e.g. who StanChart competes with more in the Private Banking segment, or more local-focused players. New to bank customers continue to be dominated by international clients (e.g. global Chinese/Indians) with a slightly higher skew towards \$1-10M AUM compared to previous trends, supported by underlying structural trends such as growth in the middle-class. The Group has seen net new money at a c15% annualised rate, compared to the structural rate of growth in the

Summary Investment Thesis and Valuation

Investment Thesis

We view StanChart as undervalued relative to the sector/EM peers at 1.0x PTNAV with significant earnings growth potential supported by structural growth drivers and relatively high capital return. We expect a c7% revenue growth CAGR across '23-26E driven by non-NII led by Wealth (driven by Affluent segment opportunities) and Financial Markets (alongside cross-border income), with the Group's previous investments producing revenue momentum. We expect NII to decline by 1% in FY26E with lower rates and pass throughs offset by volume growth, management actions (e.g. growth in higher margin areas) and a growing hedge. We expect cost growth at a c4% CAGR, with the Group's restructuring programme expected to drive material cost saves from FY26E, supporting PPOP CAGR of 13% and RoTE growing to c14% in 27/28E. Capital remains strong and we forecast distributions of c\$10.9bn compared to Group targets of >\$8bn 24-26E, and we expect a further \$1.5bn of share buybacks in 4Q25.

Valuation

We value Standard Chartered using a SOTP methodology with divisional multiples differentiated by type of business. We value Corporate, Commercial and Institutional Banking at 8.0x P/E, and Consumer, Private and Business Banking Commercial at 9.0x P/E, and Ventures at 1x book. We value excess capital above 13.0% at 1x. Our Dec-26 price target is 1,770p.

market at 8-9%.

- **Markets flow income growth to continue:** Flow income is expected to represent a higher proportion of total Markets income, with a priority to increase wallet share with clients through an expansion of the product offering by geography and product classes, particularly with Financial Institutions but also in Corporate opportunities. Episodic income is expected to be volatile but linked to capital markets, as the Banking business continues to grow (e.g. more opportunities for Markets deals such as rates/inflation hedging on the back of Banking deals).
- **Key moving parts to NII include:** 1) Rates sensitivity with forward rates indicating 11bps lower compared to previous forecasts; 2) Pass through management, particularly in the CIB where betas are higher than guidance, driven by assertive management and a high level of liquidity in the market; 3) Volumes, following a strong +4% YTD performance and above expectations; 4) Mgmt actions to manage mix with a focus on Retail CASA deposits (and time deposits for a feeder into Wealth), and customer assets instead of Treasury assets; 5) Portfolio exits. The Group's hedge is expected to continue to grow but faces limitations such as the availability of instruments, while the duration is unlikely to change.
- **Low impairments reflect management actions** with the business exiting Retail products such as credit cards and personal loans (e.g. India) unless they are part of a broader banking relationship (e.g. Wealth), and CIB business more focused towards Financial Institutions which are lower risk vs Corporates.
- **Capital deployment between divisions:** The Group is committed to improving returns in the CIB through increased network business and greater gearing to Financial Institutions which offers ROE accretion. On the other hand, capital deployment in the Affluent business is more client-led and is also trending towards capital-light Wealth-based revenues, and therefore creates limited scope for a re-balancing of capital allocation between divisions.
- **CET1 targets following P2A reduction:** The Group saw a 22bps reduction in its P2A requirements with management commenting that this in isolation doesn't shift their capital target range of 13-14%, given the Group is also subject to external capital volatility (e.g. FVOCI and FX movements). The Group acknowledges a higher margin over MDA, and stronger & more sustainable profits, although balances this with the external perception of a strong CET1 (including from the public) and rating agency benefits.

Risks to Rating and Price Target

- **Macroeconomic risks:** Being an EM-focused bank, StanChart is exposed to general macroeconomic risk in EM such as slowdowns, inflationary pressures, depreciation of EM currencies and cross border and political risks. COVID-19 continues to be a risk towards revenues and impairments in the near term, particularly in Asian economies, as well as geopolitical tensions creating a potential headwind.
- **Provisioning outlook:** We expect provisions at normalised levels across the medium term given growing pressures in the economic environment. An increase or decrease in provisions as a result of the economic outlook or with regards to specific cases poses a risk to our forecasts.

- **Regulatory uncertainty:** Standard Chartered remains exposed to changes in the regulatory environment in the UK, with capital requirements being set by the PRA in the UK. While StanChart has limited UK exposure, the Group is still subject to regulatory changes such as Basel 4 and BoE stress tests.

Standard Chartered (STAN.L, STAN LN) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Jun 27, 2001. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Abouhossein, Kian : BBVA (BBVA.MC), Banco Comercial Português (BCPLS), Banco Sabadell (SABE.MC), Bankinter (BKT.MC), Barclays (BARC.L), CaixaBank (CABK.MC), Commerzbank (CBKG.DE), DNB Bank ASA (DNB.OL), Danske Bank (DANSKE.CO), Deutsche Bank (DBKGn.DE), Goldman Sachs (GS), HSBC Holdings plc (HSBA.L), Handelsbanken (SHBa.ST), Islandsbanki (ISB.IC), Morgan Stanley (MS), Nordea Bank Abp (NDASE.ST), SEB (SEBa.ST), Santander (SAN.MC), Standard Chartered (STAN.L), Swedbank (SWEDa.ST), UBS (UBSG.S)

J.P. Morgan Equity Research Ratings Distribution, as of October 04, 2025

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	50%	38%	12%
IB clients**	50%	48%	35%
JPMS Equity Research Coverage*	48%	40%	12%
IB clients**	73%	69%	52%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.
