

Standard Chartered

Translating growth into profitability

Reiterate Rating: NEUTRAL | PO: 2,150 GBp | Price: 2,009 GBp

Investor seminar: confident messaging

Standard Chartered management presented its new medium-term targets in the May investor seminar. Key headlines include (i) 2028 ROTE of >15%, 2030 ROTE of c.18%, (ii) 2025-2028 revenue CAGR of 5-7%, (iii) 2028 cost income ratio of c.57%. While the headline 2028 ROTE target is broadly in line with consensus, we think there is upside potential, particularly to revenue and impairments given the strong structural trends highlighted by local management. We forecast a 16% ROTE for 2028, supported by revenue CAGR c.7% (top end of guidance); the stock is trading at c.1.5x 2026e P/TBV, versus the sector expected to reach c.18% ROTE in 2028 trading at similar valuations. We reiterate our Neutral rating but increase our PO to 2,150p/\$58.50 (from 2,000p/\$53.60) reflecting higher profit estimates.

Revenue upside potential from wealth as well as CIB

Wealth has been an important driver for revenue growth in the past three years, and we expect the strong trends to continue given ongoing asset diversification demand from Chinese residents. In addition, we also see upside to CIB revenues, particularly versus consensus expectations, which is only expecting mid-single-digit CAGR. While CIB revenue streams are typically lumpier in nature, the structural trends are supported by policy – with RMB internationalisation and accelerating Chinese companies ‘going global’ now seen as national security priorities.

Cost guidance positive; growth may require more capital

We noted in our preview last month that further upside could come from cost and capital optimisation. We appreciate the new cost target of c.57% cost income ratio in 2028, which would be a step change in cost efficiency. On capital, the new guidance on capital allocation (broadly one-third each for dividends, buybacks, and growth) implies that more capital may be needed than expected to support growth. While we do not dispute the logic of allocating capital to capture growth, ROTE growth should be slower than otherwise and total cash yield lower.

Company Sector

Banks-Multinational/Universal

Company Description

Standard Chartered is headquartered in London, but its major operations are in Asia and Africa, with a diverse footprint within these continents. Standard Chartered has three main divisions, including Wealth and Retail Banking, Corporate and Institutional Banking, and Ventures. The shares are listed in both London and Hong Kong in a dual primary listing.

Investment Rationale

We rate Standard Chartered Neutral. We expect Wealth growth to remain strong, and management has been successful in terms of creating differentiated products that are highly valued by their target customers. There is potential downside given the Middle East conflict and its exposure to the region. Shares are not expensive, but also not obviously cheap versus the sector.

2028 targets in line with our base case

Standard Chartered provided detailed medium term guidance at the investor seminar. For 2028, the headline includes the following which were broadly in line with our expectations pre event.

- (i) Income CAGR 5-7% 2025-2028,
- (ii) cost income ratio c.57% in 2028,
- (iii) 30-35bps through the cycle loan loss rate,
- (iv) >15% ROTE in 2028,
- (v) capital allocation about one third each for dividend, buyback and growth.

We note that management also guided to c.18% ROTE in 2030.

Upside potential from revenue, impairment, strong cost message

In our preview of the event (see the report, [Standard Chartered: High teens ROTE a possibility medium term 06 May 2026](#)), we outlined a bull case that could take ROTE to high teens in 2028 – in our view, the upside could come from (i) revenue, (ii) cost, and (iii) impairment.

CIB upside potential to consensus at 4-5% CAGR – structural trends accelerating

While wealth remains a key growth engine, it is relatively well understood by the market – with consensus already pricing in around mid-teens Wealth fee income CAGR in 2025-2028. We do think there could be upside (given Q126 was up >30% year on year), but clearly with an ever-increasing base, >20% CAGR would be incrementally more difficult, versus a backdrop of c7-9% wealth assets CAGR in Asia, according to the latest BCG Global Wealth Report.

Consensus, however, appears more conservative on the CIB side (Visible Alpha consensus suggests income growth CAGR of c.4-5% 2025-2028) and does not appear to be fully factoring in the structural opportunities. The Chinese government is increasingly focusing on (i) supporting high-quality Chinese enterprises ‘going global’ and (ii) accelerating RMB internationalisation. Hong Kong should play a key part in both, as it is already the largest offshore RMB centre and has unique strengths in internationalisation and global networks.

RMB markets revenue – progressing on to the next billion

RMB internationalisation has been a theme in the making for over a decade. However, the policy focus on it has significantly increased in recent years, in part because of heightened geopolitical tensions. State media now talks of it as a matter of national security priority.

Further adoption of the RMB as a trade currency in the long run would likely require greater availability of RMB-denominated financial products. As such, we would expect RMB bond issuance to continue increasing.

In the last six years, related income at Standard Chartered has already doubled, and we expect ongoing policy support for this to continue translating into revenue opportunities.

Source: Bloomberg, BofA Global Research

BofA GLOBAL RESEARCH

Chinese companies going global – multi-faceted opportunity

The government is also focused on supporting high-quality mainland enterprises going global, as evidenced by the ‘Go Global Task Force’ – which aims to set up a one-stop platform that fully leverages Hong Kong’s advantages in internationalisation and global.

There are many channels where these revenue opportunities could come through – on the capital markets side, this could be manifested through sustainable IPO volumes in Hong Kong but could also come through via higher cross-border hedging and treasury demands.

Standard Chartered management has made it a priority to strengthen its ‘go-global’ proposition, which includes the following:

- Deepen coverage and sector expertise, with a focus on targeting New Economy sectors.
- Monetise revenue opportunities adjacent to IPOs – IPO receiving bank, cash management, margin financing, structured products.
- Institutionalise integrated one-bank proposition across CIB and WRB.

Guidance implies Global Banking and Markets growth at least high single digits

While not guiding directly on Global Banking and Markets revenue growth, we note two pieces of supplementary guidance: (i) income return on RWA expected to be above 2025 levels by 2028 and (ii) 1/3 of capital generated expected to be allocated to business growth. CIB consumed around two-thirds of total RWAs as at 2025 – and with Wealth and Retail Banking likely continuing a more capital-light growth path, we expect CIB fee income (where Global Banking and Global Markets are key contributors) to grow by at least high single digits in 2026-2028.

Impairment – caution built in as expected, but outturn likely more benign

We continue to think that a lower loan loss rate will likely come through in the next couple of years – even though understandably management did not want to guide aggressively on it in the context of the ongoing Middle East conflict.

Like most other European banks, Standard Chartered has printed loan loss rates much lower than its historical through-the-cycle range (30-35bps) in recent years. Other than in 2020, when modelled impairments were elevated due to Covid, the loan loss rate has not been above 35bps since 2018; in fact, in the last four years, it has averaged c.20bps.

Exhibit 3: Standard Chartered loan loss rate, 2017-2025

Loan loss rate has not been above 35bps since 2018, other than during Covid

Source: Company reports

BofA GLOBAL RESEARCH

In our forecasts we assume a loan loss rate of c.28bps for 2027-2028 and see further upside potential, particularly if the Middle East conflict resolves in the near future.

Cost – firm cost commitment, productivity enhancement main driver

Management provided a confident message on cost, including c.20% increase in income per employee by 2028 and >15% reduction in corporate functions headcount by 2030 (equivalent to c.8,000 roles). This should support a cost income ratio target of c.57% by 2028.

On an all-in cost basis, including restructuring but excluding notable items, cost increased by 6-7% in the last couple of years. Cost income ratio was broadly unchanged at c.63-64% since 2023 and only reduced slightly vs 66% in 2022. At the sector level, most banks saw cost income ratio falling by c.6% between 2022 and 2025.

A 57% cost income ratio would represent a step change in its cost efficiency and bring it closer to peers.

Exhibit 4: Cost income ratio, FY22-25

On average, European banks reduced cost income ratio by c.6% between 2022 and 2025

Source: Company reports

BofA GLOBAL RESEARCH

Artificial intelligence (AI) will likely play a central role in delivering the productivity enhancements. Key pipeline deliverables include the following:

- (i) **Staff productivity in everyday work** – staff trained and actively using MS CoPilot and all relationship managers enabled with AI Advisory capabilities by end-2026.
- (ii) **AI-driven operations and processes** – the aim is to enable self-service at scale by end-2027, including 60% self-resolution for internal queries using a virtual assistant.
- (iii) **AI-driven software development** – AI-assisted engineers accelerating time to market through high-quality code, fully implemented by 2027.
- (iv) **Unified risk management and anti-crime platform** – using AI to drive resilience and productivity, fully implemented by 2027.
- (v) **Global data platform** – single, trusted data foundation to deliver consistent, high-quality data to support risk management, decision making, and compliance, fully implemented by H128.

We appreciate management's commitment to drive productivity enhancements. The AI use case is clearly something that the sector as a whole is developing, and it is not straightforward to assess a bank's 'AI-readiness' externally. However, we do think that certain investments that Standard Chartered has made in the past are likely to put it in a relatively good position to take advantage of AI-related efficiency gains. For example, it has strengthened its critical platforms in recent years, including (i) global private cloud, (ii) modern core banking platform, and (iii) global payments platform.

In addition, management's own benchmarking analysis notes that its operations and functions expenses relative to revenues continue to screen high (c.18% higher than benchmark), and AI should be a useful tool to help right size its cost base.

BofA GLOBAL RESEARCH

Capital – growth may need more capital allocation

In terms of capital allocation, management guided to one-third each between dividends, buybacks, and business growth – if there were to be suitable opportunities, further capital could be re-directed from buybacks to growth. In other words, payout ratio would be at a maximum of 67%, per guidance.

Logically, it makes sense for the bank to put capital to use given the growth opportunities available instead of returning it to shareholders. However, it does imply higher RWA growth than expected, especially in the CIB.

Total yield one of the lowest in the sector at 6-7% in 2026-2028

We acknowledge that the investment case and the growth opportunities that Standard Chartered has are different to a typical European bank. However, at the sector level, capital returns remain an important pillar to European banks' investment case. In terms of yield, Standard Chartered screens low versus the sector.

Exhibit 7: European banks total yield, 2026-2027e

Standard Chartered screens low on total returns vs the sector, at c.12% vs median 16%

BofA GLOBAL RESEARCH

Price objective basis & risk

Standard Chartered (SCBFF / SCBFY)

Our primary valuation methodology is a Gordon Growth Model based on our 2027e forecast, to which we add the present value of expected dividends. With a 11% cost of equity assumption, this suggests a price to book multiple of 1.6x, reducing to 1.5x when discounted to a year from now at our cost of equity. Applying this to 2026E tangible book value of 1,812c gives a value of 2,710c pre capital return. To this we add the dividends we forecast through to 2027E (also discounted) and adjust for excess capital to the bottom end of management guidance. Using this valuation approach, we arrive at a price objective of 2,150p (58.50 USD).

The upside risks to our PO are 1. US rates stay higher for longer, terminal rate higher than expected, 2. further stimulus from the Chinese government, 3. Emerging Asia/ Hong Kong wealth flows grow even faster than expected.

The downside risks to our PO are 1. Middle East conflict escalates leading to a global recession, 2. tightening of global liquidity, 3. US rates fall faster than expected.

Light grey shading indicates the security is not covered. Chart is current as of a date no more than one trading day prior to the date of the report.

Equity Investment Rating Distribution: Banks Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	117	53.42%	Buy	98	83.76%
Hold	59	26.94%	Hold	47	79.66%
Sell	43	19.63%	Sell	35	81.40%

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1993	55.76%	Buy	1186	59.51%
Hold	821	22.97%	Hold	509	62.00%
Sell	760	21.26%	Sell	400	52.63%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2}Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

BofAS or an affiliate was a manager of a public offering of securities of this issuer within the last 12 months: Standard Chartered.

The issuer is or was, within the last 12 months, an investment banking client of BofAS and/or one or more of its affiliates: Standard Chartered.

BofAS or an affiliate has received compensation from the issuer for non-investment banking services or products within the past 12 months: Standard Chartered.

The issuer is or was, within the last 12 months, a non-securities business client of BofAS and/or one or more of its affiliates: Standard Chartered.

In the US, retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale: Standard Chartered.

BofAS or an affiliate has received compensation for investment banking services from this issuer within the past 12 months: Standard Chartered.

BofAS or an affiliate expects to receive or intends to seek compensation for investment banking services from this issuer or an affiliate of the issuer within the next three months: Standard Chartered.

BofAS or one of its affiliates is willing to sell to, or buy from, clients the common equity of the issuer on a principal basis: Standard Chartered.

The issuer is or was, within the last 12 months, a securities business client (non-investment banking) of BofAS and/or one or more of its affiliates: Standard Chartered.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.

Refer to [BofA Global Research policies relating to conflicts of interest](#).

'BofA Securities' includes BofA Securities, Inc. ('BofAS') and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. 'BofA Securities' is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information. In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BofA Securities is under no obligation to update this information and BofA Securities' ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
